Bowles,2024-05-03 London and the Southeast of England is home to an alternative community of people called boaters individuals and families who live on narrowboats cruisers and barges along a network of canals and rivers Many of these people move from place to place every two weeks due to mooring rules and form itinerant communities in the heart of some of the UK s most built up and expensive urban spaces *Boaters of London* is an ethnography that delves into the process of becoming a boater adopting an alternative lifestyle on the water and the political impact that this travelling population has on the state *Britain's Industrial Revolution in 100 Objects* John Broom,2023-02-22 The period of Britain s Industrial Revolution was perhaps the most transformative era in the nation s history Between about 1750 and 1914 life and work home and school church and community changed irreversibly for Britain s rapidly expanding population Lives were transformed some for the better but many endured abysmal domestic and workplace conditions Eventually improvements were made to Britain s social fabric which led to the prospect of richer and more fulfilled lives for working men women and even children Focusing on 100 objects that either directly influenced or arose from these changes John Broom offers a distinctive insight

into this fascinating age With plentiful illustrations and suggestions for visits to hundreds of places of historical interest this book makes an ideal companion for a journey into Britain s industrial past **Stories for Inclusive Schools** Gill

Burton,2011-05-02 When a young English nobleman was thwarted in love he abandoned the court retired to his estate near Manchester and built a canal to serve his coalmines The Bridgewater Canal was the sensation of the age and led others to follow the example of the enterprising Duke of Bridgewater From his starting point in 1760 over the next half century Britain was covered by a network of waterways that became the lifeblood of the Industrial Revolution This is the story of 250 years of history on those canals and of the people who made and used them The book tells of the great engineers such as Telford Brindley and Jessop and of the industrialists such as Wedgwood and Arkwright who promoted the canals they built It also tells the story of the anonymous navvies who dug the canals the men and women who ran the boats and the workers who kept the canals running Covering the entire history of the canal network from the glorious early days through the years of decline caused by rail and then road competition up to the subsequent revival of the canals as leisure routes this wonderfully illustrated book is a must have for all canal enthusiasts **The River Runs Uphill** Robert Aickman,1986 *Water Ways*

Jasper Winn,2018-06-07 For a hundred and fifty years between the plod of packhorse trains and the arrival of the railways canals were the high tech water machine driving the industrial revolution Amazing feats of engineering they carried the rural into the city and the urban into the countryside and changed the lives of everyone And then just when their purpose was extinguished by modern transport they were saved from extinction and repurposed as a slow highways network a peaceful and countryside haven from our too busy age Today there are more boats on the canals than in their Victorian heyday Writer and slow adventurer Jasper Winn spent a year exploring Britain s waterways on foot and by bike in a kayak and on narrowboats Along a thousand miles of wet roads and water streets he discovered a world of wildlife corridors underground adventures the hardware of heritage and history new boating communities endurance kayak races and remote towpaths He

shared journeys with some of the last working boat people and met the anglers walkers boaters activists volunteers and eccentrics who have made the waterways their home In Britain most of us live within five miles of a canal and reading this book we will see them in an entirely new light
