The Big Thirst Charles Fishman, 2011-04-12 Praised as an entertaining and torrential flow of a book by Nature magazine The Big Thirst is a startling examination of the passing of the golden age of water and the shocking facts about how water scarcity will soon be a major factor in our lives The water coming out of your kitchen tap is four billion years old and might well have been sipped by a Tyrannosaurus rex Rather than only three states of water liquid ice and vapor there is a fourth molecular water fused into rock 400 miles deep in the Earth and that's where most of the planet's water is found Unlike most precious resources water cannot be used up it can always be made clean enough again to drink indeed water can be made so clean that it's toxic Water is the most vital substance in our lives but also more amazing and mysterious than we appreciate As Charles Fishman brings vibrantly to life in this surprising and mind changing narrative water runs our world in a host of awe inspiring ways yet we take it completely for granted But the era of easy water is over Bringing readers on a lively and fascinating journey from the wet moons of Saturn to the water obsessed hotels of Las Vegas where dolphins swim in the desert and from a rice farm in the parched Australian outback to a high tech IBM plant that makes an exotic breed of pure water found nowhere in nature Fishman vividly shows that we've already left behind a century long golden age when water was thoughtlessly abundant free and safe and entered a new era of high stakes water In 2008 Atlanta came within

ninety days of running entirely out of clean water California is in a desperate battle to hold off a water catastrophe And in the last five years Australia nearly ran out of water and had to scramble to reinvent the country's entire water system But as dramatic as the challenges are the deeper truth Fishman reveals is that there is no good reason for us to be overtaken by a global water crisis We have more than enough water We just don't think about it or use it smartly The Big Thirst brilliantly explores our strange and complex relationship to water We delight in watching waves roll in from the ocean we take great comfort from sliding into a hot bath and we will pay a thousand times the price of tap water to drink our preferred brand of the bottled version We love water but at the moment we don't appreciate it or respect it Just as we've begun to reimagine our relationship to food a change that is driving the growth of the organic and local food movements we must also rethink how we approach and use water The good news is that we can As Fishman shows a host of advances are under way from the simplicity of harvesting rainwater to the brilliant innovations devised by companies such as IBM GE and Royal Caribbean that are making impressive breakthroughs in water productivity Knowing what to do is not the problem Ultimately the hardest part is changing our water consciousness As Charles Fishman writes Many civilizations have been crippled or destroyed by an inability to understand water or manage it We have a huge advantage over the generations of people who have come before us because we can understand water and we can use it smartly The Big Thirst will forever change the way we think about water about our essential relationship to it and about the creativity we can bring to ensuring that we'll always have plenty of it

Mergent International Manual ,2009 *Displacing Human Rights* Adam Branch,2011-06-01 Today Western intervention is a ubiquitous feature of violent conflict in Africa Humanitarian aid agencies community peacebuilders microcredit promoters children's rights activists the World Bank the International Criminal Court the U.S. military and numerous others have involved themselves in African conflicts all claiming to bring peace and human rights to situations where they are desperately needed However according to Adam Branch Western intervention is not the solution to violence in Africa but instead can be a major part of the problem often undermining human rights and even prolonging war and intensifying anti-civilian violence Based on an extended case study of Western intervention into northern Uganda's twenty year civil war and drawing on Branch's own extensive research and human rights activism there this book lays bare the reductive understandings motivating Western intervention in Africa the inadequate tools it insists on employing its refusal to be accountable to African citizenries and most important its counterproductive consequences for peace human rights and justice In short Branch demonstrates how Western interventions undermine the efforts Africans themselves are undertaking to end violence in their own communities The book does not end with critique however Motivated by a commitment to global justice it proposes concrete changes for Western humanitarian peacebuilding and justice interventions as well as a new normative framework for re-orienting the Western approach to violent conflict in Africa around a practice of genuine solidarity A key strength of the book is its ability to analyse and reveal common patterns in seemingly disparate and complex

empirical instances of counterproductive human rights interventions in Uganda This book should be required reading for all those working on various themes in Africa today The Journal of Modern African Studies This book provides a pessimistic but much needed critique of the history of foreign intervention in Northern Uganda Responsible discussions of foreign policy must consider the ways in which great power politics can hurt people in the name of protection this book is an excellent place to start that discussion The Christian Science Monitor *TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP* STEVE ESOMBA, Dr.,2012-06-06 We badly need new sources of clean energy to generate electricity heat and power our industries homes and workplaces Up to now we have relied on and used only fossil fuels to power our industrial and domestic activities The byproducts of fossil fuels include irreversible pollution and contamination of our Earth climate change global warming and increase in pathogenic and medication resistant diseases Exhaustible fossil fuels are expensive to produce and distribute and not everybody can afford them Why not switch to natural non polluting inexpensive inexhaustible fuels such as solar wind water etc fuels This is the timely message contained in TWENTY FIRST CENTURY S FUEL SUFFICIENCY ROADMAP You can make this message realisable Go on reading Thanks *Daily Graphic* Ransford Tetteh,2011-02-11 **Long Crisis** Ken Fuller,2016-10-20 What s in a presidency In this book Ken Fuller methodically dissects the headline grabbing events surrounding the nine year administration of Gloria Macapagal Arroyo discussing the circumstances that led to her rise to power and allowed her to maintain hold of it despite numerous controversies Analyzing Arroyo s laundry list of alleged wrongdoings in the context of neocolonization and Philippine socioeconomic and political history he asserts that her presidency e must be seen at least in part as a product rather than the cause of the fundamental problems confronting the Philippines problems that though Arroyo is no longer president continue to plague the country

Missionaries, Mercenaries and Misfits Rasna Warah,2008-07-17 Missionaries Mercenaries and Misfits is a book that will make us re imagine our world and our place in it and force us to reconsider the value of development and what it really means to the people of Africa All the contributors to this anthology approach the notion of development through their own worldviews and experiences many are convinced that it is time to declare the death of development as an idea as an ideology and as an industry The essays in this book come from various writers most of whom are either based in East Africa or are part of its diaspora or who have worked often as developmentalists in their own way within Africa Consequently this extremely accessible collection does not attempt the grand sweep raging aimlessly against the development machine with general complaints that fail to hit their mark Rather it is a focused peep into international regional and local attempts to develop Africa thereby exposing the reader to a much needed African perspective on the development industry and why it has failed so miserably in lifting millions of people out of poverty *Ivens Dias Branco* Sergio Vilas-Boas, In 1953 when he was 19 years old Ivens started working with his father Manuel a Portuguese immigrant In less than three decades he turned Padaria Fortaleza Fortaleza Bakery into one of the largest industrial groups in Latin America in the cookies and pasta

industry He also owns hotels a cement factory a construction company and a grain transportation port in Bahia However his most special feature is actually his character and the singular way he relates to people Sergio Vilas Boas conducted 80 interviews to compose this profile shedding light on the causes and consequences of the positive unanimity of this discrete and methodical gentleman who with dedication and perspicacity immensely contributed to the socioeconomic progress of Brazil s Northeast region
