Palladio's Children N.J. Habraken, 2007-04-11 Based on many years of personal observation Palladio's Children critically examines the role of the architect as a professional descendent of Palladio and as an heir to his architectural legacy Seven innovative and carefully crafted essays explore the widening ideological schism between today's architects whose core values identity and education remain rooted in the Renaissance legacy of creating artful masterpieces and the practical demands on a profession which acts within an evolving ubiquitous and autonomous built environment or field Clearly written yet expressing complex evolving ideas this extended argument opens a new forum of debate across design theory professional practice and academic issues Moving the subject on from a historical perspective Habraken shows how architects are increasingly involved in the

design of everyday buildings This must lead to a reassessment of architects identities values and education and the contribution of the architect in the shaping of the built environment **Catalogue** Bernard Quaritch (Firm),1893

British and American Foundings of Parliamentary Science, 1774-1801 Peter J. Aschenbrenner,2017-09-28 Upon declaring independence from Britain in July 1776 the United States Congress urgently needed to establish its credentials as a legitimate government that could credibly challenge the claims of the British Crown In large measure this legitimacy rested upon setting in place the procedural and legal structures upon which all claims of governmental authority rest In this book Aschenbrenner explores the ways in which the nascent United States rapidly built up a system of parliamentary procedure that borrowed heavily from the British government it sought to replace In particular he looks at how over the course of twenty five years Thomas Jefferson drew upon the writings of the Chief Clerk of the British Parliament John Hatsell to frame and codify American parliamentary procedures Published in 1801 Jefferson s Manual of Parliamentary Practice for the Use of the Senate of the United States presents rules instances citations and commentary as modern readers would expect them to appear quoting Hatsell and other British authorities numerous times If the two nations suffered any unpleasant relations in the First War for American Independence Aschenbrenner concludes one would be hard pressed to detect it from Jefferson s Manual Indeed direct comparison of the House of Commons and the Continental Congress shows remarkable similarities between the ambitions of the two institutions as they both struggled to adapt their political processes to meet the changing national and international circumstances of the late eighteenth century The Classical Language of Architecture John

Summerson,Alan Powers,2023-09-07 Derived from the principles of Greek and Roman architecture in antiquity the classical style has long dominated the history of western architecture from the Renaissance to the present Sir John Summersons timeless text as relevant today as it was when first published distils the visual language of architecture into its core classical elements and illustrates that building throughout the ages express an awareness of the grammar of style and its rules even if they vary break or poetically contradict them From the original edifices of Greece and Rome to the recapitulations and innovations of the Renaissance the explosive rhetoric of the Baroque to the grave statements of Neo classicism and finally the exuberant eclecticism of the Victorians and Edwardians to the stripped Neo classicism of some of the moderns Summerson explains how every period has employed classical language to make their statement With a new introduction by academic and architectural historian Alan Powers this introduction continues to be one of the defining texts on the subject and is essential reading for all students of architecture **The Rise of the Image** Thomas Frangenberg,2017-07-05 The Rise of

the Image reveals how illustrations have come to play a primary part in books on art and architecture Italian Renaissance art is the main focus for this anthology of essays which analyse key episodes in the history of illustration from the sixteenth to the twentieth century The authors raise new issues about the imagery in books on the visual arts by Leonardo da Vinci Giorgio Vasari Sebastiano Serlio Andrea Palladio Girolamo Teti and Andrea Pozzo The concluding essays evaluate the roles of

reproductive media including photography in Victorian and twentieth century art books Throughout images in books are considered as vehicles for ideas rather than as transparent passive visual forms dependent on their accompanying texts Thus *The Rise of the Image enriches our understanding of the role of prints in books on art* *Buen Gusto and Classicism in the Visual Cultures of Latin America, 1780-1910* Paul B. Niell, Stacie G. Widdifield, 2013-12-15 The promotion of classicism in the visual arts in late eighteenth and nineteenth century Latin America and the need to revive buen gusto good taste are the themes of this collection of essays The contributors provide new insights into neoclassicism and buen gusto as cultural not just visual phenomena in the late colonial and early national periods and promote new approaches to the study of Latin American art history and visual culture The essays examine neoclassical visual culture from assorted perspectives They consider how classicism was imposed promoted adapted negotiated and contested in myriad social political economic cultural and temporal situations Case studies show such motivations as the desire to impose imperial authority to fashion the nationalist self and to form and maintain new social and cultural ideologies The adaptation of classicism and buen gusto in the Americas was further shaped by local factors including the realities of place and the influence of established visual and material traditions *Rome and The Guidebook Tradition* Anna Blennow, Stefano Fogelberg Rota, 2019-04-01 To this day no comprehensive academic study of the development of guidebooks to Rome over time has been performed This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century It is based on the results of the interdisciplinary research project Topos and Topography led by Anna Blennow and Stefano Fogelberg Rota From the case studies performed within the project it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early Renaissance The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform with three important points of development a turn towards a more user friendly structure from the seventeenth century and onward the so called Baedeker effect in the mid nineteenth century and the introduction of a personalized guiding voice in the first half of the twentieth century Thus the guidebook tradition is an unusually consistent literary oeuvre which also forms a warranty for the authority of every new guidebook In this respect the guidebook tradition is intimately associated with the city of Rome with which it shares a constantly renovating yet eternally fixed nature *The Present State of the Republick of Letters*, 1729 *The In & Out* Tim Newark, 2015-11-21 The Naval and Military Club or the In Out as it is affectionately known is one of Britain's greatest and oldest service clubs and this book tells its rich and entertaining history for the first time Lavishly illustrated it captures the essence of British style inside one of London's grandest clubhouses first with a famous home in Piccadilly and now in St James's Square Over 150 years its members have included numerous Victoria Cross winners triumphant generals and admirals even bold explorers There are intimate tales of brave soldiers and sailors alongside a few rogues and accounts of scandalous behaviour *The Architect and the Academy* Dean Hawkes, 2021-12-30 This book presents an expansive overview of the development of architectural and environmental

research with authoritative essays spanning Dean Hawkes impressive 50 year academic career The book considers the relationship between the technologies of the environment and wider historical and theoretical factors with chapters on topics ranging from the origins of modern building science in Renaissance England to technology and imagination in architecture It includes numerous architectural examples from renowned architects such as Christopher Wren Peter Zumthor Alvar Aalto Robert Venturi and Carlo Scarpa Aimed at students scholars and researchers in architecture and beyond this illustrated volume collates important and wide ranging essays tracing the definition scope and methodologies of architectural and environmental studies with a foreword by Susannah Hagan

Articulating British Classicism Elizabeth McKellar, 2017-07-05 Whereas the past decades have seen a profound reconsideration of eighteenth century visual culture the architecture of that century has undergone little evaluation Its study unlike that of the early modern period or the twentieth century has continued to use essentially the same methods and ideas over the last fifty years Articulating British Classicism reconsiders the traditional historiography of British eighteenth century architecture as it was shaped after World War II and brings together for the first time a variety of new perspectives on British classicism in the period Drawing on current thinking about the eighteenth century from a range of disciplines the book examines such topics as social and gender identities colonialization and commercialization notions of the rural urban and suburban as well as issues of theory and historiography Canonical constructions of Georgian architecture are explored including current evaluations of the continental intellectual background the relationship with mid seventeenth century Stuart court classicism and the development of the subject in the twentieth century
