

Using Activated Economic Analysis

Activated Economic Analysis makes it easy to access key results from [Integrated Cost Estimation](#).

Dashboard Panel

Initially, the Economics button appears in the Activation dashboard without results and turned off:

The screenshot shows a green rectangular panel titled "Economics". It contains two columns of information. The left column is labeled "Capital Cost" and shows "USD". The right column is labeled "Utility Cost" and shows "USD/Year". At the bottom right of the panel is a toggle switch that is currently in the "off" position, indicated by a grey circle and the word "off".

Before you begin to use the dashboard panel, use the [Costing Options](#) form to specify the costing template, scenario name and description, and optionally the operating life of the plant, length of plant startup, and the date for the start of basic engineering. In order to get raw material results, specify stream prices as well, and configure your model to use [utilities](#). For more details on this configuration, see [Integrated Cost Estimation](#).

Note: When Aspen Plus is running invisibly (such as from automation or from Aspen Simulation Workbook), you must make the simulation visible in order to fully initialize components needed to run activated economics. Once you have done so it should work if you subsequently make it invisible.

Run the simulation. After your run is complete, in the Economics panel on the [Activation dashboard](#), click **off** to turn the on activated economics and perform cost analysis.

Note: If there are input changes since the last run, you must re-run. If you try to use Activated Economic Analysis when there are changes since the last results, you will be asked whether to re-run the simulation or cancel the action.

When you do so, Aspen Process Economic Analyzer calculates costs and shows them in the panel:

The screenshot shows the same green rectangular panel as before, but now it displays numerical results. The "Capital Cost" is "10,762,500 USD" and the "Utility Cost" is "1,388,380 USD/Year". A green checkmark icon is visible in the top right corner of the panel. The toggle switch at the bottom right is now in the "on" position, indicated by a green circle and the word "on".

If there are warnings from economic analysis, such as some unit operations whose costs could not be calculated, a yellow warning icon ⚠ will appear on this panel. Click it to open the **Equipment** tab of the Equipment/Economics form; information about the warnings appears in the **Evaluation Errors** column at the far right of this screen. This area can also display ⛔ when economics is not available, a green check mark (as above) when results are available, and a status message when economics is calculating.

Equipment/Economics Form

Detailed economic results appear in the [Equipment/Economics](#) form. Click the capital cost result on the dashboard panel to see a summary of the costs. Click the utility cost result to see details of the utility costs. You can click the other tabs on the Equipment/Economics form to see information about specific types of equipment.

Rta Economic Analysis Manual

James V. Parkin, Deepak Sharma

Rta Economic Analysis Manual:

Economic analysis manual, version 2, 1999 **Infrastructure Planning** James V. Parkin, Deepak Sharma, 1999-07

This book introduces engineers to the principles and procedures necessary for infrastructure planning in rapidly developing regions. It covers the technical methods required in planning for infrastructure provision from base line studies and problem definition through to the specification for a set of projects. The book also discusses the political factors that affect the decision making process and demonstrates through case studies how the technical and political perspectives come together in the finished plan. *Manual of Process Economic Evaluation* Alain Chauvel, Gilles Fournier, Claude Rimbault, 2003. This volume

will enable the reader to successfully undertake pre project evaluations especially in the areas of refining and petrochemistry. It encompasses all the essential steps: market analysis, comparative studies of technical and economic issues, sensitivity studies, sizing and costing of the equipment required for an industrial scale plant, estimation of capital spending, calculation of costs and sales prices etc. The first edition of this manual proved to be a very valuable teaching tool for universities and advanced engineering and business schools both in France and abroad. It is essential for the rapid evaluation of the cost and profitability of proposed plants and of those already in operation. It has been widely used by engineers, consulting firms and corporate research and development departments. Its status as the only current publication that covers all the steps involved in the economic evaluation of projects will render it particularly valuable to its users. It will quickly become indispensable to everyone whose job it is to evaluate the economic impact of the development, cancellation or reorientation of a project.

Contents: 1 Market analysis, 2 The elements of economic calculation, 3 The determination of battery limits investments. Appendix 1 Functional modules method FMM, Appendix 2 PrE estimate method, Bibliography, Index. *Economic Evaluation of Road Investment Proposals* Thorolf Thoresen, Austroads, 2003. *Austroads Project Evaluation Compendium* Thorolf Thoresen, Austroads, 2001. **The Regional Integration Manual** Philippe De Lombaerde, Renato Flores, Lelio

Iapadre, Michael Schulz, 2012-03-29. The Regional Integration Manual brings together different methods for monitoring and analysing regional integration processes in a systematic way. Employing a multi disciplinary approach it seeks to provide officials in regional organisations, researchers in think tanks, academics and students worldwide with an accessible set of both quantitative and qualitative tools useful in their day to day work. The Manual addresses an increasing demand for such tools in a world where mechanisms and ideas for effective regional government and governance are in dire need, whereas the monitoring and analytical capabilities of official and non governmental actors often lag behind. It also addresses a rapidly growing academic community studying the determinants, depth, speed and other characteristics of regional integration and co operation. Employing a multi disciplinary approach, The Regional Integration Manual will be of interest to scholars of governance and regional politics as well as policy makers and those in regional organisations. **Handbook on Measuring**
