Analisis Regresi , *Oseanologi di Indonesia* ,1987 **Local Polynomial Kernel Regression for Generalized Linear Models and Quasi-likelihood Functions** Jianqing Fan,N. E. Heckman,M. P. Wand,University of North Carolina (System). Institute of Statistics,University of North Carolina at Chapel Hill. Department of Statistics,1992 **Local Polynomial Modelling and Its Applications** Jianqing Fan,1996 Local Polynomial Modelling and its Applications Jianqing Fan,I. Gijbels,2013-08-21 This book is on data analytic approaches to regression problems arising from many scientific disciplines These approaches are also called nonparametric regression in the literature The aim of non parametric methods is to relax assumptions on the form of a regression function and to let data search for a suitable function that describes well the available data These approaches are powerful in exploring fine structural relationships and provide very useful diagnostic tools for parametric models Over the last two decades vast efforts have been devoted to nonparametric regression analyses This book hopes to bring an up to date picture on the state of the art of nonparametric regression techniques The emphasis of this book is on methodologies rather than on theory with a particular focus on applications of nonparametric techniques to various statistical problems These problems include least squares regression quantile and robust regression survival analysis generalized linear models and nonlinear time series Local polynomial modelling is employed in a large fraction of the book but other key ideas of nonparametric regression are also discussed *The Polynomial Toolbox 2 for Use with Matlab 5* ,1999 *Rational Approximation and Orthogonal Polynomials* ,1989 *Aplikasi Model Regresi Polinomial Dan Pengoptimumannya* Adeline Bulohok,2010 Fast Computation of Auxiliary Quantities in Local Polynomial Regression B. A. Turlach,M. P. Wand,1995 Fast Computation of Auxiliary Quantities in Local Polynomial Regression Berwin A. Turlach,Matt P. Wand,1998 NOTE The following is a description of the paper and not the actual abstract In local polynomial smoothing it is often necessary to compute several auxiliary quantities Examples include degrees of freedom measures cross validation functions variance estimates and exact measures of error We investigate how binning methods can be used for the fast computation of such quantities It is shown that using binning methodology is highly beneficial The computational effort for the binned approximation to the desired quantities is of the same order of magnitude as that required for a binned local polynomial smooth **Local Polynomial Modelling and Its Applications** Jianqing Fan,1997 *Fast Polynomial Transforms* Jens Keiner,2009 **Solving Polynomial Equation Systems** Teo Mora,2003
