begun to respond this industrial change by launching the roadmap of Making Indonesia 4.0 as a strategy to ease Indonesia's steps to become one of the new powers in Asia in April 2018. This roadmap provides a clear direction for the movement of the national industry in the future including a focus on developing priority sectors that will become Indonesia's strength towards Industry 4.0. The proceeding of ICoST contains the scientific research written by the academicians, researchers, practitioners and government elements who have the same thoughts about the effort to develop the society's ability to adapt the advancement of science and technology in the global competition to face the industrial revolution 4.0. We are also very grateful to all keynote speakers and committee members willing to act as referee for their time and efforts to keep our conference going well. In the future, we expect the ICoST will be able to provide another scientific atmosphere and stimulate more participants to join this conference. *Federal Register*, 2013-11

**Role of Reservoir Operation in Sustainable Water Supply to Subak Irrigation Schemes in Yeh Ho River Basin** Mawiti Infantri Yekti, 2017-07-12. Quantitative research with respect to the combination of engineering and social/cultural/religious aspects based on the Tri Hita Karana philosophy in Subak irrigation schemes is original in the field of land and water development. A scenario analysis needs a good and careful system approach. Based on a Generic Algorithm, the RIBASIM model was applied using the dependable 80% of discharge and shifting the start of land preparation. The results provide evidence that the cropping pattern of the fifth scenario results in an overall optimal agriculture production of the Subak schemes. The recoverable flow considered in the river basin scheme model plays an important role in the optimisation. Nevertheless, if a normal hydro-climate occurs, the other scenarios, especially the first scenario, can be applied as well. When the indigenous knowledge of farmers is compromised with present-day knowledge of agricultural and technological developments, capability of these farmers increases, thus reflecting the applicability of the Tri Hita Karana philosophy on harmony among people and harmony among people and nature. **The**

**Life and Times of George Fernandes** Rahul Ramagundam, 2022-07-25. The Militant Trade Union Leader, The Dauntless Political Rebel, The Passionate Socialist Dreamer. This is a biography of India's George Fernandes. George Fernandes (1930-2019), a firebrand trade union leader, socialist politician and incredibly powerful orator, is popularly known for leading the All India Railwaymen's Federation (AIRF) in May 1974 and calling upon its approximately 1.7 million employees to strike, which brought India to a halt for twenty days. Often described as a rebel, he pursued every cause he took up with passionate devotion, heedless of the many ups and downs in his life. From the early years of fighting for the rights of dock and municipal workers of Bombay (now Mumbai) through the Emergency, which he resisted by going underground, to his last private decade as a bed-ridden Alzheimer's patient, his fights were always persistent and single-handed. George could call Bombay to be shut down and rose from its streets to become India's Defence Minister. The Life and Times of George Fernandes chronicles the story of George who rose from the streets of Bombay to stride the corridors of power. In this extraordinary biography, Rahul Ramagundam opens a window to George's political evolution and traces the course of the Socialist Party in India from its

inception in 1930s to its dissolution into the Janata Party in the late 1970s In the process this book explores the trail of India's opposition parties that worked to displace the long ruling Congress Party from its preeminent position Comprehensive evocative and fascinating this first definitive biography of George Fernandes is an unputdownable tour de force

**Advances in Plant Breeding Strategies: Industrial and Food Crops** Jameel M. Al-Khayri, Shri Mohan Jain, Dennis V. Johnson, 2019-10-14 This book examines the development of innovative modern methodologies towards augmenting conventional plant breeding in individual crops for the production of new crop varieties under the increasingly limiting environmental and cultivation factors to achieve sustainable agricultural production enhanced food security in addition to providing raw materials for innovative industrial products and pharmaceuticals This is Vol 6 subtitled Industrial and Food Crops which consists of two parts Included in Part I are 11 industrial plant species utilized as sources of raw materials for the production of industrial products including pulp and wood crops acacia fiber cotton jute and ramie rubber guayule and rubber tree oil jojoba and flax biofuels and pharmaceutical agave and sugar source sugarcane Part II covers 7 food plants selected for their utilization in food industries for the production of chocolate cacao cooking oil oil palm safflower sesame and sunflower and natural flavors and aroma saffron and vanilla This volume is contributed by 60 internationally reputable scientists from 14 countries Each chapter comprehensively reviews the modern literature on the subject and reflects the authors own experience

**Integration of Legume Crops with Cereal Crops Under Changing Climate** Samiha Ouda, Abd El-Hafeez Zohry, 2024-09-02 The world population is steadily increases with high rate in the past decade from 7 126 billion inhabitants in 2012 to 8 095 billion inhabitants in 2024 with 14% increase In the meantime the number of severely food insecure people were 604 5 million in 2014 which increased by 53% in 2020 to reach 927 6 million people These numbers raise large concerns about the future of food production to feed these continually growing population Lately

many developing countries rely on importing large quantities of crops such as wheat maize and rice to meet their food and feed needs The negative impact of climate change and its consequences namely high temperature causing low crops productivity and water scarcity which causing great disruptions in food production systems Therefore increasing the production of cereal crops worldwide can be achieved through increasing average yield per unit area or expanding the area devoted to cereals into more marginal lands Moreover breeding for more resilient cultivars which can release its potential yield could play an important role in increasing total production under the adverse growth conditions Inclusion of legume crops such as soybean peanut and cowpea in cereal based cropping systems is a viable strategy to increase production of cereal crops It also helps in reducing the use of chemical fertilizer It has been reported that intercropping legume crops with cereal crops can increase the productivity of both crops Additionally an increase in soil nitrogen phosphorus and potassium has been also reported when legume crops were included in cereal based cropping system It has been also reported that inclusion of legume crops increases the soil water holding capacity and water used efficiency Thus inclusion of legume crops in cereal based cropping systems can increase its productivity as well as attains the sustainable use of soil and water resources In this book we will thoroughly tackle the benefits of the integration of legume crops within cereal based cropping system namely wheat maize and rice paddy and upland under the changing climate current and future We also reviewed the innovations and interventions that could sustainably intensify the production of cereals to reduce hunger and poverty We will use both modeling and simulation approaches to assess the impact of climate change using CMIP6 mean projection of two future scenarios namely SSP1 2 6 and SSP5 8 5 in two time intervals 2060 2079 and 2080 2099 on the yield and water requirements of wheat maize and rice paddy and upland

**The Revaluation of Women's Work** Sheila Lewenhak,2013-11-05 This book provides a survey and analysis of the different ways in which women s work is valued throughout the world It challenges the narrow definition of work as paid work as that excludes so many of women s activities It looks at ways in which women s worth has been consistently undervalued in industrial as well as non industrial countries in socialist as well as free enterprise economies These practices distort the national product of countries heavily dependent on women s labour but above all they are among the most obvious

marks of the exploitation of women Technological changes are already altering established female male divisions of labour Transnational enterprises often located in Special Economic Zones are reducing differences between industrial and nonindustrial countries Valuing women s work correctly whether unpaid in the home or underpaid outside it is part of the battle against discrimination and poverty Men who do similar work also benefit It is the crucial step towards the achievement of male female equality The book will be particularly valuable for those concerned with the issues in trade unions women s groups international agencies and NGOs and for course in economics and social studies

*Aphids as Plant Pests: From Biology to Green Control Technology* Julian Chen,Leornado Abdiel Crespo Herrera,Frédéric Francis,2024-01-19 Aphids Hemiptera Aphidoidea are one of the most important and destructive agriculture pests causing serious economic losses by both nutrient robbing and transmitting plant viruses 100 species of Aphididae have exploited the agricultural environment successfully to the extent that they are of significant economic importance among them 15 aphid species of most agricultural importance Aphids are piecing sucking insect pests with the mouthparts stylets to penetrate plant cells to feed phloem sap from sieve elements The feeding process of aphids is similar to pathogen infestation and plenty of evidence demonstrate that the interplay between aphid and host plants follows the pathogen plant Zigzag model During the process of probing and feeding aphids like plant pathogens secreted some salivary proteins as effectors or elicitors into their host plants cell intercellularly and intracellularly to mediate aphid plant interactions such as eliciting or suppressing plant defense responses Aphids also vector plant viruses and the relationship between each organismal pair affects the overall outcome of this biological interaction Aphids contained endosymbionts and the symbionts influence interaction between the aphids and their host plants and between aphids and their natural enemies further impacting this network of biological interactions Advances in understanding aphids biology and these interactions at the physiological molecular and ecological levels will provide fundamental knowledge and develop novel green control strategies for insect pests as well as vector pathogens

**Strategi Pengendalian Organisme Pengganggu Tanaman** Ika Rochdjatun Sastrahidayat,2015-01-01 Bumi sebagai sebuah planet penting dalam sistem tata surya solar system sampai saat ini masih dianggap sebagai suatu kawasan utama bagi kelangsungan organisme hidup untuk berkembang biak sekaligus mempertahankan kehidupannya survival Hal ini masih

dianggap relevan mengingat belum ditemukannya planet sejenis blue planet yang di dalamnya didapat sumber air sebagai indikator daya dukung utama bagi kelangsungan kehidupan itu sendiri Untuk itulah bumi kita sering pula disebut dengan istilah biosfer biosphere yang menurut Ellis 2013 merupakan komponen biologi pada bumi yang di dalamnya termasuk juga lithosphere hydrosphere atmosphere dan sphere lainnya seperti cryosphere dan anthrosphere Sehingga istilah biosfer termasuk seluruh organisme hidup di bumi berdampingan dengan organ mati yang dihasilkannya Recognition and Response in Plant-Virus Interactions Ronald S.S. Fraser, 2013-06-29 Mechanisms of resistance to plant viruses are diverse and probably involve different types of recognition events Often a cascade of changes affecting broader aspects of defence and metabolism is switched on progressively after the initial recognition event Virulence i e resistance breaking behaviour of the virus involves a failure or alteration of recognition or subsequent signalling Consequences of these recognition events are the ways in which the pathogenic effects on the host are exerted formation of visible symptoms and control of plant growth This volume offers a comprehensive coverage of the recognition and signalling events between plants and viruses whereby the particular attraction of viruses and viroids is that they can now be completely defined in molecular terms they offer excellent opportunities for studying the molecular biology of signalling and may even provide useful guidelines on how plants and cellular pathogens interact
