Paid Survey Sites That Work 2015:

Throwaway Nation Jeff Dondero, 2019-03-15 Americans are burying ourselves in our own waste. It's befouling our air, land, waters, food, and bodies. The US tosses out enough foodstuff to feed the rest of the world. America is the largest buyer of fashion and cosmetics, the second dirtiest industry in the world. We lead the planet in transportation usage and waste, and we're now polluting outer space. *Throwaway Nation* takes a look at the pileup of waste in the US, including the problem of plastic, the industry of overmedication, e-waste products, everyday garbage, fast fashion trash, space waste, and other forms of profligacy that serve to make our nation the biggest waster on the planet. Looking at the environmental impact of so much garbage, Dondero explores not just how we got here and where we're headed, but ways in which we might be able to curb the tide. From what you do and don't eat, what and how your products are packaged, the rampant production of clothes, the space and waste in which you work and live, what you breathe, eat, drink, the tools you use to work and play, the energy overproduced and ill-used for a pleasant lifestyle, the waste you generate, and how humans are beginning to clutter the cosmos, all and more are profiled in *Throwaway Nation*, and what we ought to do to prohibit and mitigate the flow of our garbage and to use it productively.

Work-Life Balance in the Modern Workplace Sarah De Groo, 2017-06-23 The term work-life balance refers to the relationship between paid work in all of its various forms and personal life, which includes family, but is not limited to it. In addition, gender permeates every aspect of this relationship. This volume brings together a wide range of perspectives from a number of different disciplines, presenting research findings and their implications for policy at all levels: national, sectoral, enterprise, workplace. Collectively, the contributors seek to close the gap between research and policy with the intent of building a better work-life balance regime for workers across a variety of personal circumstances, needs, and preferences. Among the issues and topics covered are the following: differences and similarities between men and women, and particularly between mothers and fathers in their work choices; third shift work, work at home, at night, or during weekends; effect of the extent to which employers perceive management of this process to be a burden; employers' exploitation of the psychological interconnection between masculinity and breadwinning; organisational culture that is more available for supervisors than for rank-and-file workers; weak enforcement mechanisms and token penalties for non-compliance by employers; trade unions as the best hope for precarious workers to improve work-life balance; crowd work on demand; performance of tasks by persons selected remotely through online platforms from a large pool of potential and generic workers; an example of how to use work-life balance insights to evaluate the law; collective self-scheduling; employers' duty to accommodate; financial hardship as a serious threat to work-life balance. As it has been shown clearly, that work-life conflict is associated with negative health

outcomes exacerbates gender inequalities and many other concerns this unusually rich collection of essays will resonate particularly with concerned lawyers and legal academics who ask what work life balance literature has to offer and how law should respond
