

In Web, the back gesture performs the same function as the back button on the browser, allowing you to move back through previously viewed pages.

The **forward** gesture, available in Web only, is a swipe from left to right anywhere in the gesture area. The forward gesture allows you to move forward through previously viewed web pages.

Drag: Drag is the gesture you make for a slow scroll up and down, such as in a list, in a document, or on a web page. Slide your fingertip slowly along the surface—no need to bear down.

One kind of drag that you'll use a lot brings up **Quick Launch** when you're in an application. This drag gesture begins in the gesture area and ends on the touchscreen. As your fingertip slowly crosses the border between the gesture area and the touchscreen, it seems to drag Quick Launch into view. To open one of the apps in Quick Launch, move your finger to its icon. When you see the app name appear, lift your finger. The application opens.

You also make the drag gesture as part of a drag and drop.

Flick: As its name tells you, this is a quick gesture, great for scrolling long lists, documents, or pages. Do it fast, do it lightly; as with a swipe, your fingertip just skims the surface. The faster you flick, the faster and farther you scroll up or down a list.

To **close an application** in Card view, flick the card up toward the top of the touchscreen. This is called **throwing** the card off the top of the screen.

In some applications, such as Email and Messaging, you can throw a list item off the side of the screen to delete the item.

If an application is maximized, you can flick up from the gesture area to the screen to minimize the app and display Card view. This is the **up** gesture. If you make the up gesture when Card view is displayed, you open the Launcher.

Management in Sub-Saharan Africa, 2002 Soil degradation and nutrient depletion have become serious threats to agricultural productivity in Africa. Soils cannot supply the quantities of nutrients required and yield levels decline rapidly once cropping commences. This book addresses these issues and includes papers from an international symposium held at Cotonou, Benin, October 9-12, 2000, organized by the International Institute of Tropical Agriculture, Ibadan, Nigeria, and the Department of Land Management of the Katholieke Universiteit Leuven, Belgium. In five main parts, it marks the end of a first phase of collaborative research on Balanced Nutrient Management Systems for the Moist Savanna and Humid Forest Zones of Africa and concludes with recommendations providing essential reading for crop and soil scientists.

Contrast Craig A. Coppock, 2007 This guidebook illustrates the basic concepts involved in the science of fingerprints and fingerprint identification. It clarifies many of the oversimplified generalities that pervade the science of fingerprint identification and highlights the many possibilities and limitations of fingerprint identification. Chapters are arranged logically to facilitate greater knowledge and skills. The second edition highlights the full breadth of Dactylscopy, the science of friction skin individualization. A full explanation of forensic science's comparative methodology: Analysis, Comparison, Evaluation, and Verification process, or ACE-V, is reviewed. A detailed narrative of the Daubert requirements is provided, and how these new procedural directives cover the admission of scientific evidence and expert testimony. The guide also offers ideas for upgrading standard operational office procedures relating to fingerprint comparisons and is followed by a training outline. This outline will allow 10 print and latent print examiners to reach their full potential as specialized experts. A new glossary offers 356 comprehensive definitions of fingerprint terms. The chapters are liberally illustrated to aid the reader. The book is designed to be read in its entirety or to be referenced as a guidebook, as many concepts and information are repeated and cross-referenced. The information helps the reader to understand the relationships, benefits, and limitations of crime scene fingerprint evidence. *Contrast* will be an excellent quick reference source and is intended for new and experienced crime scene investigators, patrol officers, attorneys, and criminal justice students who seek to add fingerprint identification to their investigative skills.
