### INSTALLATION

Connect the amplifier to 12 volt battery using No. 16 wire or larger. OBSERVE POLARITY. Positive to red marked wire and negative to black wire (GROUND). Connect both positive and negative leads directly to the battery. Failing to do so may result in distortion of the transmitted signal and a loss in power output. Make sure all connections are tight or soldered if possible. The majority of all problems experienced are due to improper installation techniques. REVERSING POLARITY MAY CAUSE DAMAGE TO THE AMPLIFIER. Install the amplifier where adequate air flow is available to cool it. This amplifier was designed and optimized to operate with 3-4 watts AM drive. Do not use more than 4 watts drive as this will shorten the RF transistors life and severely distort the quality of the transmitted signal.
