s notion of press freedom ensures not only an individual right to speak but also a public right to hear Seeing press freedom as essential for democratic self governance Ananny explores what publics need what kind of free press they should demand and how today s press freedom emerges from intertwined collections of humans and machines If someone says The public needs a free press Ananny urges us to ask in response What kind of public what kind of freedom and what kind of press Answering these questions shows what robust self governing publics need to demand of technologists and journalists alike
