RAO, 2023-03-25 Election financing freebies and welfare schemes when prefaced with the democratic structure incorporated in our Constitution and the democratic way of functioning that have taken away the credentials of democracy and seem to blur the democratic system and the underlying spirit We have made hundreds of laws rules regulations schemes guidelines but failed to appreciate the fact that without fairness and somewhat seeming transparency in the framework of the democracy we have been following for the last seventy two years or so which is like painting one's own face with different colors to evade identification of the flow of funds in the election financing besides those official permitted by the Government of India Freebies born thereafter as a kin of the election financing now reached a stage where there is a storm brewing This erodes our performance and achievements with democracy as our base of governance

*The Political Economy of Agricultural Policy Reform in India* Regina Birner, Surupa Gupta, Neeru Sharma, 2011 Agricultural policy reform is one of the major challenges facing India today Such reform is required to reduce poverty through faster agricultural growth and to promote more sustainable use of natural resources while ensuring food security Subsidy policies that promote the use of fertilizer and of electricity for groundwater irrigation are in particular need of reform While subsidies for these two inputs played a crucial role in achieving

India's Green Revolution they have been criticized during the past decade for benefitting large scale farmers more than smallholders placing a fiscal burden on the state and having negative environmental effects By analyzing the evolution of these input subsidy policies and examining the political processes involved in efforts to reform them this study throws new light on the factors that have so far prevented a move toward more pro poor and environmentally sustainable agricultural input policies in India The authors show that electoral politics institutional factors and policy paradigms or belief systems all play an important role in blocking reform They identify several policy reform options as well as political strategies that can overcome past obstacles to reform Community based policy solutions new coalitions for policy reform fresh approaches to the policy debate innovative and consensus oriented forms of deliberation and effective use of research based knowledge can all make positive contributions to Indian policy reform The analyses and proposals presented in this study will be a valuable resource for policymakers and stakeholders concerned with the politics of agricultural development **Guidebook for**
