Confronting Hunger in the USA Adam M. Pine, 2016-07-01 Food insecurity in the US is a critical issue that is experienced by approximately 15% of the population each year Hunger is not caused by an inability to produce enough food for the population but is instead a manifestation of federal agricultural policies that support the overproduction of commodity crops and neoliberal social policies that seek to lower the amount of benefits dispersed to those in need This book focuses on how four different food based community programs address both the physical sensation of hunger as well as the political and economic disempowerment that work against the ability of people experiencing food insecurity to mobilize as a political force Confronting Hunger in the USA argues that most food programs do more to create community among their volunteers than among program participants and tend to reinforce neoliberal understandings of citizenship Community food programs reach out to the most vulnerable members of society in caring and gentle ways and often use the language of alternative economies to articulate a different relationship between the individual and the state However the projects in this study act as individual pieces of the state s insufficient social safety net and are only beginning to articulate a new relationship between food and society

Heavy Helene A. Shugart,2016-06-07 The current obesity epidemic has been at the top of the national and increasingly global public agenda for the last decade the subject of extensive and intensive concern scrutiny and corrective efforts from various quarters In the United States much of this attention is predicated on the official discourse or story of obesity that it is a matter of personal responsibility specifically to the end of monitoring and ensuring appropriate caloric balance However even though it continues to have cultural presumption that discourse does not resonate with the populace which may explain why efforts of redress have been notoriously ineffective In this book Helene Shugart places obesity in cultural political and economic context arguing that current anxieties regarding obesity reflect the contemporary crisis in neoliberalism and that the failure of the official discourse of obesity mirrors the failure of neoliberalism more broadly specifically to account for authenticity a powerfully resonant cultural concept today She chronicles a number of competing discourses of obesity that have arisen in response to the failed official discourse examining and evaluating each in relation to the idea of authenticity assessing the practical and behavioral implications of each discourse for both obesity incidence and redress and establishing the significance of each discourse for negotiating neoliberalism in crisis more broadly
