to make connections between the topics they study and their personal interests and provide eleven example projects for exploring science sociology history art and math Educational Technology Beyond Content Brad Hokanson, Gregory Clinton, Andrew A. Tawfik, Amy Grincewicz, Matthew Schmidt, 2020-04-09 This book is the outcome of a research symposium sponsored by the Association for Educational Communications and Technology AECT Consisting of twenty four chapters including an introduction and conclusion it argues that informational content should not be the main element of education and that to provide more for learners it is necessary to go beyond content and address other skills and capabilities It also discusses the false premise that learning is complete when the information is known not when learners seek more their own directions answers and ideas The authors assert that the ability to synthesize solve problems and generate ideas is not based on specific content although education often focuses solely on teaching content Further they state that content can be separated from the learning process and that instructional design and educational technology must be about the skills habits and beliefs to be learned **Teaching for Intellectual and Emotional Learning (TIEL)** Christy Folsom, 2009-01-16

Responsibility compassion and self direction are the kind of balanced common sense characteristics that both teachers and students should develop Yet in an environment of high stakes testing common sense and educational balance are often lost amidst constant test preparation Teaching for Intellectual and Emotional Learning TIEL A Model for Creating Powerful Curriculum will help teachers and teacher educators meet their goals of mastery in basic skills and content knowledge as well as intellectual and social emotional development Sharing the experiences of real teachers who changed their teaching and helped their students understand their learning and develop skills of self direction and collaboration Folsom introduces a powerful visual model that helps teachers develop standards based curriculum that includes social emotional learning New ways of planning lessons and developing project based units that focus on developing thinking skills and social emotional learning are presented The TIEL model makes the fundamental intellectual and social emotional processes that underlie effective teaching and learning accessible to teacher educators teachers and students in gifted special and general education
