Addison,2016-08-30 Multiple Bram Stoker Award winning author Jonathan Maberry compiles more than twenty stories and poems written by members of the Horror Writers Association in this terrifying collection about worst fears What scares you Things that go bump in the night Being irreversibly different A brutal early death The unknown This collection contains stories and poetry by renowned writers such as R L Stine Neal and Brendan Shusterman and Ellen Hopkins all members of the Horror Writers Association about what they fear most The stories include mermaids ghosts and personal demons and are edited by Jonathan Maberry multiple Bram Stoker award winner and author of the Rot Ruin series *Working the Ruins* Elizabeth St. Pierre,Wanda Pillow,2002-05-03 From some of the leading feminist scholars in education comes a collection of writings discussing how they use feminist poststructural theory in their classrooms and research Drawing on real life situations in their work they show how using this theory has transformed their work Topics covered include theory in everyday life ethnography writing the body emotions in the classroom qualitative research and gossip as a counter discourse The range of topics processes and styles presented provides the reader with a variety of examples illustrating the diversity and power of the effects of poststructural theory as well as showing the possibilities of work still to be done **Sham Ruins** Brian Willems,2021-11-29 In the middle of the eighteenth century a new fad found its way into the gardens of England s well to do building fake Gothic ruins Newly constructed castle towers and walls looked like they were already falling apart even on the first day of their creation Made of stone plaster or even canvas these sham ruins are often considered an embarrassing blip in English architectural history However *Sham Ruins A User s Guide* expands the specific example of the sham ruin into a general principle to examine the way purposely broken objects can be used to both uncover old truths and invent new ones Along with architecture work by Ivan Vladislavi Tom Stoppard Alain Mabankou Aleksei Fedorchenko Michael Haneke and Sturtevant is used to develop this thesis as well as artifacts such as pre torn jeans fake histories and broken screen apps Using these examples one of the key questions the book raises is what is it that sham ruins ruin In other words if real ruins are ruins of what they actually are then sham ruins should be considered ruins of what they are not Thus sham ruins are about imposing new meaning where such meaning does not and should not exist They also can show how things we think are functioning well are actually already broken Sham ruins do this and much more by being lies ruses and embarrassments This is what gives them the power with which we can think about objects in new unintended ways
