Me 262 vs P-51 Mustang Robert Forsyth,2019-12-26 Arguably two of the finest fighters built during the course of World War II the Me 262 and P 51 Mustang heralded new dawns in aircraft performance Making its operational debut in the summer of 1944 and powered by the Jumo 004 jet engine the Me 262 outclassed Allied planes in terms of speed and firepower ratio offering a formidable punch with four 30 mm MK 108 nose mounted cannons However in the P 51 fitted with

the Rolls Royce Packard Merlin engine and drop tanks the USAAF finally had a fighter that had the legs to escort its heavy bombers deep into Reich airspace and back. If flown to its strengths the P 51 was more than capable of taking on the feared Me 262 on an equal footing despite the differences in power and top speed. Indeed the Mustang proved to be the Luftwaffe fighter arm's nemesis. When the P 51D sortied over Germany from the summer of 1944 onwards it shredded through the ill trained and depleted Gruppen of the Luftwaffe's defence wings. This book examines the two fighters in detail exploring their history and development and containing accurate descriptions of the combats between the P 51 Mustang and the Me 262 in what were some of the most bitter and large scale aerial actions fought over Europe in 1944-45.

P-51 Mustang Cory Graff, 2015-09-10 Celebrate 75 years of the iconic World War II warbird that helped win the war and flew into the heart of American life. From D Day to the Battle of the Bulge through reconnaissance missions and combat fighting flying bombs and Me 262 Stormbird jets P 51 Mustang pilots saw it all during World War II. P 51 Mustang celebrates the 75th anniversary of the most iconic American warbird written by Cory Graff lead curator at the Flying Heritage Collection one of the world's most important collections and sites for warbird restoration. The entire story of this plane is here starting with the astonishing fact that the P 51 Mustang was built in less than 120 days. This first version was hardly a world beater and it took the addition of a Rolls Royce designed Merlin to make the Mustang a legend. These nimble and versatile fighters were able to escort Allied heavy bombers all the way to Berlin and back. In the Pacific their long range ability was pushed to its limit with pilots flying 1 500 mile eight or more hour missions over water to attack Tokyo. On the home front Graff profiles the impact manufacturing Mustangs had on workers in Los Angeles and Dallas. The United States wasn't finished with the P 51 Mustang after World War II. It was used in the Korean War and afterwards as a symbol and icon of American ingenuity. Graff explores the post World War II history of this iconic plane making this a book that every single World War II history and aviation enthusiast will want to buy.

It discusses the Mustangs used by all US allies and friends in many foreign air forces. Also it adds to the story of its creation through the wise choices made by the British government and its Royal Air Force especially the transition from its original Allison V 12 to the wizard like Rolls Royce V 12 called the Merlin. The book will be profusely illustrated with high quality mono and colour images many of which have not been published before and features beautifully drawn profiles and numerous appendices. It also features numerous first hand accounts of the Mustang in battle during World War 2 the Korean War and other conflicts.
