In order to offer medical care that is safe, successful, patient-centered, prompt, practical, and fair, professionalism is essential. Through oaths and standards, the fundamental principles of medical professionalism are profoundly ingrained in the historical setting. Numerous studies, such as the one by Bhardwaj (2022), have shown that unprofessional actions by healthcare professionals have a negative effect on health outcomes. These include an increase in infections, readmission rates, health complications, client financial and mental damage, exposure to medical malpractice, reduced job satisfaction, and higher staff turnover among team members (Bhardwaj, 2022). As a result, professionalism in healthcare is an integral element that focuses on the creation of safe conditions and the provision of quality care.

Professionalism has been a cornerstone of clinical practice since the days of Hippocrates, acting as the foundation of medicine's connection to society. This unofficial understanding was revived in the 1990s when experts in the medical establishment outlined a more sophisticated set of ethical principles and performance expectations that have to be met in the provision of clinical therapy (Bhardwaj, 2022). These critical components have gradually been integrated into undergraduate and graduate education and training. This took place along with a focus on appropriate professional behavior and the advancement of moral guidelines for the efficient and safe provision of clinical treatment in addition to actions in the public sphere (Poorchangizi et al., 2019). Benevolence, reliability, accountability, the pursuit of excellence, understanding of responsibility, autonomy, truthfulness, righteousness and honesty, cooperation, compassion for others, ongoing learning and progress, and humility make up the essential elements of this paradigm for professionalism (Bhardwaj, 2022). As a result, when looking at professionalism, it is first necessary to consider the main aspects maintained since antiquity.

However, professionalism must be reviewed in terms of the association's guidelines. For example, according to the Association of American Medical Colleges, professionalism is essential for becoming a qualified doctor (Forouzadeh et al., 2018). Professionalism is built on three pillars: medical competence, communication abilities,

But what kind of professionalism is this? In whose interest is its recovery and what effects will it have? And how does this development relate to changes in other countries and other professions? *The Politics of Professionalism* provides authoritative answers to these questions. It does so by setting the debates in their historical context and by drawing on detailed research findings on teachers' experience of work and education especially the curriculum in the current era.
