Clinical Guide to Effective Psychological Assessment and Report Writing Rosemary Flanagan, 2024-09-17 The book examines the preparation and presentation of psychological data reports for various stakeholders e.g. teachers, parents, caregivers. It details strategies for clear and effective prose and visuals that reach beyond the narrative and emphasize data integration. Chapters are organized around specific themes contained in the overall report and its sections e.g. cognitive achievement, social, emotional, personality, as well as the process of data reporting, its description, and eventual communication to consumers. The volume addresses the rationale for and considerations important to carrying out this mission, including reporting and explaining data obtained from English language learners (ELLs). It provides examples of sample data sets detailing how to apply and illustrate these principles and reflect contemporary data interpretation. In addition, the book provides checklists, as well as appendices and tables that should be considered when preparing reports. The book discusses the processes and mechanics of integrating data within and across sections of reports, thereby providing alternatives to strictly boilerplate reports, as well as practical recommendations that can be readily implemented to benefit students. Key areas of coverage include: Preparing psychological reports for all stakeholders; Data presentations for lay audiences; Contemporary data reporting not driven by a boilerplate; Illustrations of data integration and customized prose; Generating intervention recommendations for students using descriptive data; Tailoring the writing process to create defensible reports for school clinical and neuropsychological referrals. This volume is an essential resource for researchers, professors, graduate students, as well as clinicians, therapists, and other professionals in developmental, clinical, child, and school psychology, educational assessment, testing, and evaluation, social work, public health, and all interrelated disciplines.

Historical Foundations of Educational Psychology John A. Glover, Royce R. Ronning, 2013-11-11 This volume

represents a beginning effort to compile a history of educational psychology The project began innocuously enough several years ago when we decided to add mon material about the history of educational psychology to the undergraduate course we were teaching What seemed like a simple task became very complex as we searched in vain for a volume dealing with the topic We ended up drawing on various histories of psychology that devoted anywhere from a few paragraphs to several pages to the topic and on a very few articles addressing the issue We were startled frankly by the apparent lack of interest in the history of our field and decided to attempt to compile a history ourselves As is the case with any edited volume the contributing authors deserve credit for its positive features They uniformly made every effort asked of them and taught us much about educational psychology Any errors or omissions are our responsibility alone
