Transforming Curriculum Through Teacher-Learner Partnerships Nair, Pradeep, Keppell, Michael James, Lim, Chee Leong, Mari, Tamil Salvi, Hassan, Nurhanim, 2020-12-11 Empowering learners for life requires a fundamental shift in higher education curriculum design. New priorities, pedagogies, technologies, spaces, and assessment strategies are required to enable learners to take ownership of their learning. Student-centeredness concepts are still prescriptive in nature as most decisions on curriculum, assessment, teaching, and learning approaches are still teacher-centric. Teachers are developing student-centered learning environments without the involvement of the learners in the planning, decision-making, and/or design process. In addition, some lecturers are still practicing the traditional approaches of content delivery and conventional assessment methods rather than experimenting with innovative practices suited for student-centered approaches. Therefore, there is an ongoing need for research focused on the importance and effectiveness of a paradigm shift in education that involves student-teacher partnerships fueled by innovative teaching and learning designs where students take an active role and contribute as partners in learning. *Transforming Curriculum Through Teacher-Learner Partnerships* captures experiences and evidence among teachers in exploring the possibility of active student participation in curriculum design, delivery, and assessment through teacher-learner partnership. The chapters address issues of teacher-learner partnerships in designing the learning environment and how student-centered methods create resilient, adaptable, and future-capable learners. While highlighting topics within this scope such as learner autonomy, learning performance, self-efficacy, and teaching pedagogy, this book is ideally intended for teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in issues related to the teacher-learner partnership.

Economics Douglas McTaggart, Christopher Findlay, Michael Parkin, 2015-05-20 High quality, engaging content for students. Ultimate flexibility for educators. The seventh edition of this benchmark Australian text continues to offer students a comprehensive and relevant introduction to economics whilst offering educators the ability to customise and deliver content your way. *Economics* 7th edition provides a streamlined approach to study and recognises the difficulties some students may face in comprehending key concepts. By leaving the more technical content and application until later, students can enjoy the more exciting policy material from the beginning and engage with the content early. Through compelling examples, clear explanations, and the latest instructive on-line resources, the text draws students into the content and reinforces learning through practice and solving problems which are relevant to them. The authors train students to think about issues in the way real economists do and learn how to explore difficult policy problems and make more informed decisions by offering a clear introduction to theory and applying the concepts to today's events, news, and research.

Multisensor Decision And Estimation Fusion

Yunmin Zhu,2012-12-06 YUNMIN ZHU In the past two decades multi sensor or multi source information fusion tech niques have attracted more and more attention in practice where observations are processed in a distributed manner and decisions

or estimates are made at the individual processors and processed data or compressed observations are then transmitted to a fusion center where the final global decision or estimate is made. A system with multiple distributed sensors has many advantages over one with a single sensor. These include an increase in the capability, reliability, robustness, and survivability of the system. Distributed decision or estimation fusion problems for cases with statistically independent observations or observation noises have received significant attention; see Varshney's book *Distributed Detection and Data Fusion* (New York: Springer Verlag, 1997). Bar Shalom's book *Multitarget Multisensor Tracking: Advanced Applications* (vol. 1-3, Artech House, 1990, 1992, 2000). Problems with statistically dependent observations or observation noises are more difficult and have received much less study. In practice, however, one often sees decision or estimation fusion problems with statistically dependent observations or observation noises. For instance, when several sensors are used to detect a random signal in the presence of observation noise, the sensor observations could not be statistically independent when the signal is present. This book provides a more complete treatment of the fundamentals of multi-sensor decision and estimation fusion in order to deal with general random observations or observation noises that are correlated across the sensors.

Active and Transformative Learning in STEAM Disciplines Miltiadis Demetrios Lytras, 2023-11-20. *Active and Transformative Learning in STEAM Disciplines* is a unique reference volume for the new student-centric and objectives-oriented learning environment where individual and team learning paths enhance problem-solving capabilities.

English for Academic Purposes - Oxford Handbooks for Language Teachers Edward de Chazal, 2014-04-10. Gives an up-to-date overview of the research into English for Academic Purposes and discusses key concepts.

Language Testing and Assessment Aek Phakiti, 2025-09-18. This book covers crucial knowledge and skill sets for developing language tests and setting assessments. Aimed at practitioners of applied linguistics and TESOL, the book covers the theoretical and methodological framework and rationale for language test use, assessment techniques in different language skills, and basic strategies for analysis of test quality. It stresses the importance of test reliability, validity, and fairness in language assessment, provides its audience with theoretical and practical knowledge in language assessment, forms an accessible gateway into the often intimidating world of language assessment, and a unique opportunity for the readers to ground their knowledge of principles in language assessment research. This book equips readers with the ability to use theories and principles in language testing and assessment to design and use language tests and assessments optimally given the available time and resources in a given context and promote good practice and research in language testing and assessment.

Advancing Online Teaching Kevin Kelly, Todd D. Zakrajsek, 2023-07-03. The goal of teaching online is fundamentally the same as teaching face-to-face: facilitating the learning of all students to the greatest extent possible. This book differs from other books on online teaching in that in the process of offering guidance on course design and planning, developing outcomes and appropriate engaging activities, managing the workload and assessment, the authors pay explicit attention throughout to the distinct and diverse needs of

students and offer effective strategies to accommodate them in a comprehensive and inclusive way by using the principles of Universal Design for Learning. By following those principles from the outset when planning a course all students will benefit and most particularly those whom the research shows have the greatest achievement gaps when taking online courses: males, first generation and low income students, those from underrepresented minority groups, the academically underprepared, students with disabilities and those with limited online access or lacking readiness for online learning. Beyond good planning and design, Kelly and Zakrajsek offer ideas for creating inclusive course environments and activities such as using culturally appropriate content and making it accessible in multiple formats. They also share methods to foster faculty learner interaction and increase personal connections with students and among students through group activities or learning communities which are so critical to motivation and success. Faculty new to online teaching as well as more experienced readers will find a wealth of practical guidance on developing and honing both fully online and blended courses and as importantly a wealth of proven ideas to help the new generation of students with diverse needs to succeed.

The Routledge Handbook of Second Language Acquisition and Language Testing Paula Winke, Tineke Brunfaut, 2020-12-28. This Handbook with 45 chapters written by the world's leading scholars in second language acquisition (SLA) and language testing dives into the important interface between SLA and language testing: shared ground where researchers seek to measure second language performance to better understand how people learn their second languages. The Handbook also reviews how to best measure and evaluate the second language (L2) learners' personal characteristics, backgrounds and learning contexts to better understand their L2 learning trajectories. Taking a transdisciplinary approach to research, the book builds upon recent theorizing and measurement principles from the fields of applied linguistics, cognitive science, psychology, psycholinguistics, psychometrics, educational measurement and social psychology. The Handbook is divided into six key sections: 1. Assessment concepts for SLA researchers; 2. Building instruments for SLA research; 3. Measuring individual differences; 4. Measuring language development; 5. Testing specific populations; and 6. Measurement principles for SLA researchers.
