book introduces the conceptual and theoretical tenets of policy framing and shows how this analytical lens offers a unique perspective on issues in EU policy making *Policy-Making in the European Union* Laura Cram, 2005-06-28 Laura Cram takes a fresh view at attempts to conceptualize the process of European integration Her book explores the impact of the day to day work of policy maker interest groups and bureaucrats in influencing the environment in which European Treaty formulation and ratification are taken She sheds new light on the wide range of policy areas in which institutions such as the Commission of the European Union and the European Court of Justice have succeeded in expanding the scope of EU competence despite national government opposition Policy Making in the European Union - Policy Making and Implementation Heiko Bubholz, 2002-07-19 Seminar paper from the year 2002 in the subject Politics Topic European Union grade 1 0 A Jagiellonian University in Krakow Centre for European Studies course EU Law and Institutions language English abstract Now in January 2002 a visible step in European integration has been accomplished With the introduction of the European currency about 296 8 millions citizen¹ of the European Union EU will hold the new symbols of unity of Europe s peoples in their hands What began with an attempt of reconciliation and co operation via the ECSC in 1952 has now developed towards a so far unprecedented transfer of sovereign rights and competence from nation states to a supranational intergovernmental organisation However throughout the EU prevail doubts concerning the deeper mechanism of policy making Despite certain inscrutability and the mysterious nature of decision making there are demands for more democracy in the Union On the other side it may be assumed that most of the European citizen do not really take notice of high and low politics decided upon in the European institutions Aim of this paper shall therefor be a closer elaboration of the policy making process in the European Union the enforcement of decisions on European and national level and finally influences or interdependencies from outside the formal institution interfering in Europe s policy and polity Hence the results of the Nice IGC are not ratified yet which might not be assumed soon I focus on the binding regulations of the Amsterdam Treaty² After a short description of the as I would prefer to name it macro level Commission Council Parliament Courts where provisions are concluded the implementation of this policies and decisions on the micro national level shall be explained thereafter Finally outside impetus lobbying national interests etc on the decision and interpretation process shall be elaborated in a limited scope as well *Telecommunications Policy-making in the European Union* Joseph W. Goodman, 2006-01-01 This book offers a good study of the development of telecommunications policy by the EU Great value to those interested in understanding both European telecommunications policy and more generally in how policy making operates in the EU Mark Thatcher West European Politics the book provides an interesting perspective on the evolution of nature of telecommunications policy making within the EU As a consequence the book should be of interest to telecommunications and politics government researchers alike Jason Whalley Communications Booknotes Quarterly This well written book deals with the emergence and shaping of telecommunications policy in Europe with a particular focus on the time period of 1987 1998

This book fills an important gap reviewing the initial formative years of European telecommunications policy development and liberalization in detail. The book captures the complicated and interdependent policy formation process in Europe in a credible and thoughtful way without falling into the trap of admiring critical personalities and key actors. The author has written an important and useful book which invites the research community to further explore the evolution of European telecommunications policy.

Erik Bohlin *Communications Strategies: Examining the emergence of a European Union telecommunications policy*. Joseph Goodman explains how and why the policy developed as it did and why certain reforms in the sector were easier to achieve than others. He provides a history of the key actors in the policy making process from the first attempts by the national postal telegraph and telecommunication administrations to coordinate their telecommunications policies in the 1950s to the implementation of a comprehensive EU telecommunications regulatory structure in 1998 and the development of a new regulatory structure in 2003. The analytical framework employed by the author draws upon new institutionalism and actor based approaches providing an opportunity to evaluate the utility of a synthetic approach for examining and explaining EU policy making. The focus of his analysis is on the European Commission's two pronged strategy of liberalisation and harmonisation which began in the late 1980s and culminated in an important milestone on January 1st 1998 when the EU Member States fully opened their telecommunications markets to competition. He concludes that a synthetic approach which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis is useful even necessary in understanding and explaining the many dimensions of EU policy making. This authoritative study will be of interest to all those in the telecommunications industry including attorneys, consultants and lobbyists who would like to know how the EU's policy developed. It will appeal more generally to political scientists and scholars of European history and politics.

The Role of Political Parties in the European Union Bjorn Lindberg, Anne Rasmussen, Andreas Warntjen, 2013-09-13 At the national level political parties play an important role in making representative democracy work They help to aggregate and communicate policy preferences link decision making between different legislative bodies and hold politicians accountable In

the European Union however the electoral connection is weak This casts doubt on the impact of partisan politics at the European level Are political parties able to fulfil their role as transmission belts ensuring political accountability and consistent decision making in the European Union To answer this question we look at the micro foundations of partisan politics in the European Union The contributions in this volume all depart from a common theoretical framework but use a wide range of empirical data and research designs covering qualitative process tracing elite interview and large N quantitative analysis Moreover they examine party effects in the electoral and legislative arena Finally the volume covers all European institutions the Commission the Council of the European Union the European Council and the European Parliament The findings enhance our understanding of the workings of decision making in Brussels add to the debate on the EU democratic deficit and highlight the usefulness of drawing upon insights from the literature on Comparative Politics when studying the European Union This book was published as a special issue of the Journal of European Public Policy **EU**

Environmental Policies in Subnational Regions Antje C.K. Brown, 2017-10-05 This title was first published in 2001 Despite the fact that environmental directives are one of the strongest areas of policy decreed by the EU it has a much poorer record when it comes to actual implementation of these policies Instead of focusing on the traditional state centrist accounts this book compares two subnational regions within the EU Scotland and Bavaria and their role in the policy process The author offers a multi layered implementation map which highlights three main government layers involved in the filtering process and identifies various formal and informal determinants which shape EU environmental policies during the process The book not only compares implementation performances between the two regions and their respective states but also compares the region s processes against the national processes thereby exposing determinants that would otherwise remain undetected In doing so it confirms that subnational regions feature determinants which differ in many respects from national determinants and influence the effectiveness of EU environmental policies The book contributes to a better understanding of the implementation deficit and presents a more refined picture of the EU environmental policy reality
