perspective in these important and pressing areas for feminist research and praxis The Dynamics of Two-Party Politics Alan Ware, 2009-06-11 This book examines the role played by the parties themselves in two party systems It rejects the argument that the behaviour of the parties is determined largely by social forces or by the supposed logic of the electoral market Instead it shows that both structure and agency can matter It focuses on three major aspects of change in two party systems i why occasionally major parties such as the British Liberals collapse ii why collapsed parties sometimes survive as minor parties and sometimes do not and iii what determines why and how major parties will ally themselves with minor parties in order to maximize their chances of winning With respect to the first aspect it is argued that major parties are advantaged by two factors the resources they have accumulated already and their occupying role similar to that called by Thomas Schelling a focal arbiter Consequently party collapse is rare When it has occurred in nation states it is the result of a major party having to fight opposition on two separate fronts The survival of a collapsed party depends largely on its internal structure when a party has linked closely the ambitions of politicians at different levels of office party elimination is more likely The main arena in which agency is significant that is when leadership is possible including the politician acting as heresthetician is in the re building of coalitions This is necessary for maximizing the chances of a party winning but for various reasons coalitions between major and minor parties are usually difficult to construct Comparative Politics is a series for scholars and students of political science that deals with contemporary issues in comparative government and politics The General Editor is David M Farrell Jean Monnet Chair in European Politics and Head of School of Social Sciences University of Manchester The series is published in association with the European Consortium for Political Research **An Anatomy Of Ghanaian Politics** Naomi Chazan, 2019-02-28 The paths of African states have diverged markedly since the termination of colonial rule Nevertheless Ghana the first African state to achieve independence epitomizes both the political gyrations and the overall stagnation common to many other countries on the continent This work concentrates on the 1969 1982 period in Ghana focusing on two interrelated facets of African politics the decline of state power and authority and adjustments to political recession The author traces the dual patterns of diminution of the state and the adaptation of autonomous coping mechanisms in the separate spheres of political leadership political structures and institutions ideology and political economy The dynamic of state society interactions is then treated in terms of the rhythm of dissent conflict and disengagement Dr Chazan provides a comprehensive study of Ghanaian politics from the 1970s to the present By systematically analyzing the process of political decline and regeneration she highlights similar processes apparent elsewhere in Africa The stress on the subtleties and direction of political change has important implications for policymakers and policy analysts alike **The Politics of Religion and the Religion of Politics** Ira Sharkansky, 2000-01-01 Prominent political theorist Ira Sharkansky looks at the intersection of religion and politics using the case of Israel where a chief rabbi officiates along with a prime minister to examine how the two inform each other Focusing more on similarities than differences Sharkansky demonstrates

that both religion and politics can justify their position on the moral high ground Both are involved in shaping our values and standard of living however neither religion nor politics can claim a monopoly of virtue Political demagogues have their religious equivalents in self serving prophets and false messiahs and politicians and religious leaders both may violate the morality that they preach Sharkansky examines the place of intellectual certainty doubt charisma and passion in both realms He argues that Israel among other Western democracies where politics and religion intersect supports a successful fusion of the two
