Great Britain and the East ,1916 John Jewel and the Problem of Doctrinal Authority Wyndham Mason

Southgate,1962 John Jewel Bishop of Salisbury was after Archbishop Parker the most important English churchman in the decisive Elizabethan era His organizational work and voluminous doctrinal writings contributed largely to the stabilization of the Anglican Church in the early years of Elizabeth s reign Among the most effective apologists in an age noted for them an eminent humanist and patristic scholar Bishop jewel brought the spirit of the new enlightenment to bear on the problem of authority which naturally arose after the Reformation s initial years of rupture and polemics A thorough knowledge of Christian tradition and scriptural interpretation enabled Jewel to find a solution that avoided authoritarianism on the one hand and its opposite extreme of total dependence on individual inspiration on the other The English Church of his time strengthened by this solid basis for a continuing via media and by the brilliance of Bishop jewel s exposition of it took cognizance of its own identity and the Establishment emerged a reality A later generation of Anglican apologists faced with the challenge of Puritanism also leaned heavily on the theories Jewel developed This study of his work and character thus holds a key to the understanding of several of the most important ideas and institutions to evolve during these formative periods of modern civilization *The English Catalogue of Books [annual].* ,1921 Vols 1898 include a directory of publishers

Allergies, Poisoning and Intolerance to Common Substances Marlon Gustavo Múnera Gómez, Oscar Correa Jimenez, Juana Bustillo Arias, 2025-09-01 The purpose of this book is to provide guidance on issues that can be confused in clinical practice such as allergies intolerance and poisoning to common substances like alcohol certain foods meats shellfish and vegetables medications metals and vitamins among others Our experience in the study of allergic diseases and toxicology at the clinical and basic level has shown that there is some confusion and difficulty to understand the underlying mechanisms in the development of allergic responses and intolerance for example to shellfish This often delays or may mislead the diagnosis and management of both clinical entities For this reason this book offers a structure that allows first to understand the bases of the allergic response to different substances of consumption or frequent exposure Second to compare the mechanisms explaining the intolerance towards these substances For example in the chapter discussing allergy and intolerance to dairy products we present an immune mechanism mediated by IgE in the case of allergy while intolerance indicates a metabolic mechanism of enzyme deficiency However in both cases there are usually errors or misinterpretation in their knowledge Lastly regarding toxicology the bases of poisoning by these substances will be described when applicable This is the case of alcohol for example The work will be a useful tool for the training of medical personnel in these areas and for students and researchers interested in the investigation of these phenomena
