Theoretical Aspects of Evolutionary Computing
 Leila Kallel, Bart Naudts, Alex Rogers, 2013-03-09 During the first week of September 1999 the Second EvoNet Summer School on Theoretical Aspects of Evolutionary Computing was held at the Middelheim campus of the University of Antwerp

Belgium Originally intended as a small get together of PhD students interested in the theory of evolutionary computing the summer school grew to become a successful combination of a four day workshop with over twenty researchers in the field and a two day lecture series open to a wider audience This book is based on the lectures and workshop contributions of this summer school Its first part consists of tutorial papers which introduce the reader to a number of important directions in the theory of evolutionary computing The tutorials are at graduate level and assume only a basic background in mathematics and computer science No prior knowledge of evolutionary computing or its theory is necessary The second part of the book consists of technical papers selected from the workshop contributions A number of them build on the material of the tutorials exploring the theory to research level Other technical papers may require a visit to the library Books in Print Supplement
