## **Pearson Square Word Problems:**

Pearson's Magazine, 1901      *Contributions to Quantitative Linguistics* Reinhard Köhler, Burghard B. Rieger, 2012-12-06  
QUALICO has been held for the first time as an international conference to demonstrate the state of the art in quantitative linguistics. This domain of language study and research is gaining considerable interest due to recent advances in linguistic modelling, particularly in computational linguistics, cognitive science, and developments in mathematics like modern systems theory. Progress in hardware and software technology together with ease of access to data and numerical processing has provided new means of empirical data acquisition and the application of mathematical models of adequate complexity. This volume contains the papers read at QUALICO 91 and provides a representative overview of the state of the art in quantitative linguistic research.

Quality education Muchativugwa L. Hove, Martha Matashu, 2021-11-30  
This book investigates the intersections between education, social justice, gendered violence, and human rights in South African schools and universities. The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education, social justice imperatives, gendered violence in the lives of women and children, and marginalised communities. The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa. Contributors to this volume examine the many ways in which social justice and gendered violence mirror, express, project, and articulate the larger phenomenon of human rights violations in Africa, and how in turn the discourse of human rights informs the ways in which we articulate, interrogate, conceptualise, enact, and interpret quality education. The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces. This book is essential reading for scholars seeking a solid grounding in exploring quality education, the instances of epistemic disobedience, the political implications of place and power, and human rights in theory and practice.
