will be of particular interest to postgraduates with an interest in coordination chemistry catalysis supramolecular chemistry metallobiology and related aspects of biochemistry

Water Chemistry Stanley E. Manahan, 2010-08-19 Carefully crafted to provide a comprehensive overview of the chemistry of water in the environment Water Chemistry Green Science and Technology of Nature's Most Renewable Resource examines water issues within the broad framework of sustainability an issue of increasing importance as the demands of Earth's human population threaten to overwhelm the planet's carrying capacity Renowned environmental author Stanley Manahan provides more than just basic coverage of the chemistry of water He relates the science and technology of this amazing substance to areas essential to sustainability science including environmental and green chemistry industrial ecology and green sustainable science and technology The inclusion of a separate chapter that comprehensively covers energy including renewable and emerging sources sets this book apart Manahan explains how the hydrosphere relates to the geosphere atmosphere biosphere and anthrosphere His approach views Planet Earth as consisting of these five mutually interacting spheres He covers biogeochemical cycles and the essential role of water in these basic cycles of materials He also defines environmental chemistry and green chemistry emphasizing water's role in the practice of each Manahan highlights the role of the anthrosphere that part of the environment constructed and operated by humans He underscores its overwhelming influence on the environment and its pervasive effects on the hydrosphere He also covers the essential role that water plays in the sustainable operation of the anthrosphere and how it can be maintained in a manner that will enable it to operate in harmony with the environment for generations to come Written at an intermediate level this is an appropriate text for the study of current affairs in environmental chemistry It provides a review and grounding in basic and organic chemistry for those students who need it and also fills a niche for an aquatic chemistry book that relates the hydrosphere to the four other environmental spheres

Integrated Approach to Coordination Chemistry Rosemary A. Marusak, Kate Doan, Scott D. Cummings, 2007-03-07 Coordination chemistry is the study of compounds formed between metal ions and other neutral or negatively charged molecules This book offers a series of investigative inorganic laboratories approached through systematic coordination chemistry It not only highlights the key fundamental components of the coordination chemistry field it also exemplifies the historical development of concepts in the field In order to graduate as a chemistry major that fills the requirements of the American Chemical Society a student needs to take a laboratory course in inorganic chemistry Most professors who teach and inorganic chemistry laboratory prefer to emphasize coordination chemistry rather than attempting to cover all aspects of inorganic chemistry because it keeps the students focused on a cohesive part of inorganic chemistry which has applications in medicine the environment molecular biology organic synthesis and inorganic materials

Ethics in the University

James G. Speight, 2016-09-13 It is the continuous reports of unethical behavior in the form of data manipulation cheating plagiarism and other forms of unacceptable behavior that draw attention to the issues of misconduct The causes of misconduct are manifold whether it is the need to advance in a chosen discipline or to compete successfully for and obtain research funding Disappointingly individuals who are oriented to any form of dishonesty are individuals who had previously displayed little or no consideration for the feelings of others and are therefore more interested in themselves at the expense of the students and others recognizing them by any means necessary This ground breaking and honest examination of ethics in the university setting is unabashed in its descriptions of misconduct in the academic world The text is well furnished with numerous citations that point to academic misconduct and the final chapter deals with the means by which misconduct can be mitigated a strong reminder to everyone in the academic community that above board conduct must be part of our overall message of learning and part of the whole point of education in the first place A must have for academics and non academics alike this text is the second in a series of books on ethics by James G Speight and it is useful to anyone in any industry who is interested in ethical behavior and how to navigate the sometimes murky depths of our professional lives **Alcoholism**

Aggregation and Fragmentation Culbert B. Laney, 2025-04-16 Particle dynamics with aggregation and fragmentation occurs in almost every branch of science and engineering Examples include the formation of stars and planets in astrophysics the formation of colloids and polymers in chemistry the formation of raindrops and snowflakes in meteorology the formation of fuel sprays in mechanical engineering impact damage to aircraft and satellites in aerospace engineering and drilling and blasting in civil and mining engineering This is one of the first textbooks to give particle dynamics with aggregation and fragmentation a full treatment putting it on an equal footing with fluid dynamics and solid mechanics To help readers understand the connections to fluid dynamics this book shows how particle dynamics occurs in ideal gases granular gases and fluid turbulence Instead of relying on empirical results that apply only under specific circumstances the book uses broad physical principles such as conservation of mass momentum and energy The text draws on rigorous mathematical theory and modern high performance computing while avoiding the complex details The book also provides extensive references for

those readers who need them While intended for a graduate level audience the book is written in a graphically rich style which will be accessible to advanced undergraduates In particular it includes over 100 figures and over 200 examples most of which are placed into grey boxes to avoid interrupting the main text While surveying the relevant research literature this book also draws on the author s unique insights into particle aggregation and fragmentation gained from participating in relevant research and development activities in industry and academia for over 25 years Anti-Corrosive Nanomaterials Renhui Zhang,Lei Guo,Ime Bassey Obot,2023-08-15 Corrosion is a great challenge in many industries especially in the automotive aerospace and oil and gas industries with conservative estimations accounting for losses of around 2 2 trillion US dollars per year in the United States alone Providing a comprehensive overview of the history and development of nanomaterials this book discusses various practices for protection against corrosion Key Features Provides a comprehensive and updated review of major innovations in the field of nanomaterials in industrial corrosion and environmental science and engineering Encompasses design characterization mechanism and application of nanomaterials from different strategies on the efficacy and major challenges associated with successful scaleup designing Essential reference for present and future research in nanomaterials Includes relevant aspects of organic and inorganic nanomaterials hybrid nanomaterials and nanocoatings in anticorrosion applications Coalescing a wide range of research on nanomaterials and anticorrosion practices this book is of particular appeal to students industry professionals and academics **Carbon** Tapan Gupta,2017-10-25 All living things contain carbon in some form as it is the primary component of macromolecules including proteins lipids nucleic acids RNA and DNA and carbohydrates As a matter of fact it is the backbone of all organic chemistry compounds forming different kinds of bonds Carbon The Black the Gray and the Transparent is not a complete scientific history of the material but a book that describes key discoveries about this old faithful element while encouraging broader perspectives and approaches to its research due to its vast applications All allotropes of carbon are described in this book along with their properties uses and methods of procurement or manufacturing Black carbon is represented by coal gray carbon is represented by graphite and transparent carbon is represented by diamond **ICOCIT-MUDA 2019** Ismail Suardi Wekke,Suyatno Ladiqi,Peter John Wanner,Rustamadji,Robbi Rahim,2020-05-07 The First International Conference on Science Technology and Multicultural Education ICOCIT MUDA initiated by Universitas Pendidikan Muhammadiyah UNIMUDA Sorong It was July 25th 26th 2019 in Sorong West Papua Indonesia Currently the Rector of UNIMUDA Sorong is Rustamadji Ph D he is the first rector of the university He encouraged the Institute of Research and Community Service to run the academic event Then the committee usefully run The First ICOCIT MUDA as the premier event since the university convert from college to university The First International Conference ICOCIT MUDA was the collaboration with Universitas Muhammadiyah Surakarta Universitas Prof Dr Moestopo Beragama and Forum Dosen Indonesia West Papua The conference was supported by generosity of Badan Pemeriksa Keuangan RI attend as Keynote Speaker Prof Dr Bahrullah Akbar Prof Dr
