

PEDIATRIC CASE STUDY

CASE 1: A 6-Year-Old Girl With Fever and Abdominal Pain

Physical Examination

A 6-year-old girl presented to the emergency room with a 3-hour history of left-side abdominal pain and fever. Her mother reported that the patient fell asleep after having dinner, which consisted of refried shrimp rice and broccoli left over from 3 nights prior. Nobody in the house ate the same food. About an hour and a half later, the patient woke up screaming in pain and holding her left side, saying it was hurting. In addition, the mother reported that the child had a fever of 102.6° F 2 days ago, but denied any vomiting, diarrhea, or dysuria. She stated that the patient also had a mild cough and that her last bowel movement was about 2 days ago.

The past medical history was negative.

Vital Signs: Oral temperature 102.8° F, pulse 177, respiratory rate 28/min, blood pressure 132/85 mmHg

Weight: 30.2 kg

Peripheral oxygen saturation on room air: 98%

General Appearance: The patient is alert and appears to be in moderate distress, holding her left side and curled up in the fetal position

Cardiovascular: Regular heart rate and rhythm

Respiratory: Breath sounds clear on auscultation bilaterally

Abdomen: Soft, with moderate tenderness to deep palpation over the left lower quadrant; bowel sounds audible, without hepatosplenomegaly or costovertebral angle tenderness.

The remainder of the physical examination was within normal limits.

provide additional online activities for learning and self evaluation **Patient Safety** Abha Agrawal, Jay Bhatt, 2023-10-16

This book aims to serve as a playbook and a guide for the creation of a safer healthcare system in the contemporary healthcare ecosystem. It meets this goal through examinations of clinical case studies that illustrate core principles of patient safety, coverage of a broad range of medical errors including medication errors and solutions to reducing medical errors that are widely applicable in many settings. Throughout the book, the chapters offer viewpoints from healthcare leaders, accomplished practitioners and experts in patient safety. In addition to highlighting important concepts in patient safety, the book also provides a vision of patient safety in the subsequent decade. Furthermore, it will describe what changes need to fall into place between now and the next 10-15 years to have that future realized. The book presents and analyzes a number of cases to illustrate the most common types of medical errors and to help readers learn the key clinical, organizational and systems issues in patient safety. Patient Safety 2nd edition is an invaluable text for all physicians, healthcare workers, policymakers and residents who are working towards a more equitable and effective healthcare system. **Program**

Evaluation Kenneth J. Linfield, Emil J. Posavac, 2018-09-03. This text provides a solid foundation in program evaluation, covering the main components of evaluating agencies and their programs, how best to address those components and the procedures to follow when conducting evaluations. Different models and approaches are paired with practical techniques such as how to plan an interview to collect qualitative data and how to use statistical analyses to report results. In every chapter, case studies provide real world examples of evaluations broken down into the main elements of program evaluation: the needs that led to the program, the implementation of program plans, the people connected to the program, unexpected side effects, the role of evaluators in improving programs, the results and the factors behind the results. In addition, the story of one of the evaluators involved in each case study is presented to show the human side of evaluation. This new edition also offers enhanced and expanded case studies, making them a central organizing theme and adds more international examples. New online resources for this edition include a table of evaluation models, examples of program evaluation reports, sample handouts for presentations to stakeholders, links to YouTube videos and additional annotated resources. All resources are available for download under the tab eResources at www.routledge.com 9781138103962 *Occupational Therapy Models for Intervention with Children and Families* Sandra Barker Dunbar, 2007. This textbook explores recent theoretical models that enable occupational therapists to practice and interact with families in a more holistic and occupation-centered manner. It offers the latest information on viewing the broader contexts of environment and family in order to meet diverse occupational needs in a range of settings. The editor presents a variety of case scenarios that feature culturally diverse populations and varying diagnoses of children with occupational needs. With contributions from 11 leaders in occupational therapy, this comprehensive text is designed to increase awareness and understanding of theoretical models and their relationship to current occupational therapy practice with today's children and families. Traditional frames of reference in

pediatric practice are explored including sensory integration and neurodevelopmental treatment. Some current theoretical models discussed include the Model of Human Occupation, the Person-Environment-Occupation model, the Ecology of Human Performance model, and the Occupational Adaptation model. The new Occupational Therapy Practice Framework is incorporated throughout the text. Overall, the textbook employs a practical approach to this significant aspect of pediatric practice in occupational therapy.
