Instrumental Biology, Or The Disunity of Science Alexander Rosenberg,1994-11 Do the sciences aim to uncover the structure of nature or are they ultimately a practical means of controlling our environment In Instrumental Biology or the Disunity of Science Alexander Rosenberg argues that while physics and chemistry can develop laws that reveal the structure

of natural phenomena biology is fated to be a practical instrumental discipline Because of the complexity produced by natural selection and because of the limits on human cognition scientists are prevented from uncovering the basic structure of biological phenomena Consequently biology and all of the disciplines that rest upon it psychology and the other human sciences must aim at most to provide practical tools for coping with the natural world rather than a complete theoretical understanding of it
