## Penser La Crise:

**A Critical Theory for the Anthropocene** Nathanaël Wallenhorst, 2023-09-15 This volume which is rooted in biogeophysical studies addresses conceptions of political action in the Anthropocene and the tension between a desire to accomplish the Promethean project of modernity and a post Promethean approach This work explores the idea of an anthropological mutation of political consolidation from a post Promethean togetherness to creating the capacity to act together The political thinking of the human condition developed by Hannah Arendt is important here as a resource for thinking about humanity in terms of human adventure This has three dimensions hubris the world and coexistence referring respectively to the logic of profit of the homo oeconomicus the logic of responsibility of the homo collectivus and the logic of the hospitality of the homo religiosus The intellectual and political attitude outlined in this book is an extension of critical theory the work also puts forward a critique of what poses a problem in our relationship to the world and suggests how to overcome it the ultimate goal being social transformation The author propose an uprising and an anthropological consolidation of politics based on the revitalization that is brought about by the sharing of a conviviality both between humans and with what is non human The identification of conviviality as an educational paradigm to survive the Anthropocene gives us the much needed reason for hope despite this heritage of the Anthropocene In addition to Arendtian thinking this critical theory for the Anthropocene draws on the political thinking of several contemporary authors including Maurice Bellet Hartmut Rosa Andreas Weber Dominique Bourg and Christian Arnsperger This volume is of interest to researchers in the Anthropocene

Karamanic,2012-01-05 Drawing on visual materials film art graffiti street art public advertisement memorials the essays of this collection offer detailed views on the cultural and political dynamics that preceded and emerged in the wake of the Yugoslav conflicts of the 1990s      *African Studies in Geography from Below* Michel Ben Arrous,Lazare Ki-Zerbo,2009 The doctrine of international relations inter state indeed territorial ideologies the logic of autochthony and its ramifications ethnic cleansing are all hinged at different levels upon the same pseudo fact to every society a closed and exclusive territory demarcated by fixed and linear borders This way of thinking totally foreign to African societies for a long time has generated today more contradictions than it can ever solve The authors of this book make a clear distinction between territory formation from the top as being a deliberate political project and its formation from below as being a more diffused historical process which is determined by the scheme of antagonisms and compromises between social forces In lieu of a stark opposition between the top and below the authors unveil the interdependence and mutual influence which form the basis of a dual system within which legal formation by the colonial authorities first then by the postcolonial one is confronted with a host of subaltern spatial dynamics neglecting thereby the legitimacy which only they can provide As an essential read for anyone who is interested in the relationship between knowledge and power this book offers stimulating perspectives on the issue of African unity and its epistemological and political challenges It renews profoundly our approaches to human security citizenship borders and mobility      **The Duty of Memory** Sébastien Ledoux,2025-07-01 Within France the expression duty of memory le devoir de mémoire speaks to a complex and ever evolving relationship with the past Emerging in the 1970s this term raised questions about memorialization which dominated public debates in the 1990s highlighting France's entanglements with colonialism and the Holocaust Drawing on a variety of interviews archival sources and data surveys author S bastien Ledoux spotlights how the trajectory of this term offers a lens for understanding contemporary societies relationship with the past on a global scale      *Studia Phaenomenologica XI / 2011* Christian Ferencz-Flatz,2011-01-01

**The Epoch of Universalism 1769-1989 / L'époque de l'universalisme 1769-1989** Franck Hofmann,Markus Messling,2020-11-23 2019 witnessed the 30th anniversary of the German reunification But the remembrance of the fall of the Berlin Wall coincided with another event of global importance that caught much less attention the 250th anniversary of Napoleon Bonaparte's birth There is an undeniable historical and philosophical dimension to this coincidence Napoleon's appearance on the scene of world history seems to embody European universalism soon thereafter in the form of a modern imperial project whilst scholars such as Francis Fukuyama saw in the events of 1989 its historical fulfilment Today we see more clearly that the fall of the Berlin Wall stands for an epistemic earthquake which generated a world that can no longer be grasped through universal concepts Here we deal with the idea of Europe and of its relation to the world itself Picking up on this contingency of world history with an ironic wink the volume analyses in retrospect the epoch of European universalism It focusses on its dialectics polemically addressing and remembering both 1769 and 1989 L ann e 2019 a t

marqué par le 30<sup>e</sup> anniversaire de la réunification de l'Allemagne clipsant un autre événement d'envergure mondiale le 250<sup>e</sup> anniversaire de Napoléon Bonaparte La dimension philosophico historique de cette coïncidence ne peut pourtant pas être négligée si l'arrivée de Bonaparte sur la scène de l'histoire mondiale semble incarner l'avènement de l'universalisme européen bien tenté amen prendre sa forme moderne et impériale certains penseurs ont suggéré avec Francis Fukuyama que 1989 marquait son accomplissement historique Aujourd'hui il apparaît au contraire que la chute du mur de Berlin a été un véritable tremblement de terre pistonné et rendu inopérants les concepts universels Dans le monde d'après c'est l'idée d'Europe et sa relation au monde que nous avons affaire Revenant par un geste ironique sur cette contingence historique le présent volume se veut une analyse rétrospective de l'époque de l'universalisme dans toute la dialectique que les commémorations de 1769 1989 ont fait surgir

Guichaoua, 2011-11-08 Understanding Collective Political Violence offers a unique view on contemporary processes of violent political mobilization across continents Africa Latin America South East Asia and the Middle East It pays particular attention to unconventional combatants such as women or children and details the drivers of their violent engagement

Degenerative Realism Christy Wampole, 2020-06-23 A new strain of realism has emerged in France The novels that embody it represent diverse fears immigration and demographic change radical Islam feminism new technologies globalization American capitalism and the European Union but these books often best sellers share crucial affinities In their dystopian visions the collapse of France Europe and Western civilization is portrayed as all but certain and the literary mode of realism begins to break down Above all they depict a degenerative force whose effects on the nation and on reality itself can be felt Examining key novels by Michel Houellebecq Frédéric Beigbeder Aurélien Bellanger Yann Moix and other French writers Christy Wampole identifies and critiques this emergent tendency toward degenerative realism She considers the ways these writers draw on social science the New Journalism of the 1960s political pamphlets reportage and social media to construct an atmosphere of disintegration and decline Wampole maps how degenerative realist novels explore a world contaminated by conspiracy theories mysticism and misinformation responding to the internet age's confusion between fact and fiction with a lament for the loss of the real and an unrelenting emphasis on the role of the media in crafting reality In a time of widespread populist anxieties over the perceived decline of the French nation this book diagnoses the literary symptoms of today's reactionary revival

*Border Studies* Thomas M. Wilson, 2025-08-11 This multidisciplinary book provides a diverse overview of social science approaches to geopolitical borders social boundaries and cultural frontiers An array of esteemed specialists examine political imaginaries of border security and identify methodological innovations that will enhance future scholarly work in the field They also discuss the multiplicity of borders with a view to addressing the question how far have we come

**The Specter of Capital** Joseph Vogl, 2014-10-22 In his brilliant interdisciplinary analysis of the global financial crisis Joseph Vogl aims to demystify finance capitalism with its bewildering array of new instruments by tracing the historical stages through which the financial market

achieved its current autonomy Classical and neoclassical economic theorists have played a decisive role here Ignoring early warnings about the instability of speculative finance markets they have persisted in their belief in the inherent equilibrium of the market describing even major crises as mere aberrations or adjustments and rationalizing dubious financial practices that escalate risk while seeking to manage it The market knows best this is a secular version of Adam Smith's faith in the market's invisible hand his economic interpretation of eighteenth century providentialist theodicy which subsequently hardened into an oikodicy an unquestioning belief in the self regulating beneficence of market forces Vogl shows that financial theory assisted by mathematical modeling and digital technology itself operates as a hidden hand pushing economic reality into unknown territory He challenges economic theorists to move beyond the neoclassical paradigm to discern the true contours of the current epoch of financial convulsions

**The Empire of Value** Andre Orlan, 2023-10-31 An argument that conceiving of economic value as a social force makes it possible to develop a new and more powerful theory of market behavior With the advent of the 2007 2008 financial crisis the economics profession itself entered into a crisis of legitimacy from which it has yet to emerge Despite the obviousness of their failures however economists continue to rely on the same methods and to proceed from the same underlying assumptions Andr Orlan challenges the neoclassical paradigm in this book with a new way of thinking about perhaps its most fundamental concept economic value Orlan argues that value is not bound up with labor or utility or any other property that preexists market exchange Economic value he contends is a social force whose vast sphere of influence amounting to a kind of empire extends to every aspect of economic life Markets are based on the identification of value with money and exchange value can only be regarded as a social institution Financial markets for example instead of defining an extrinsic objective value for securities act as a mechanism for arriving at a reference price that will be accepted by all investors What economists must therefore study Orlan urges is the hold that value has over individuals and how it shapes their perceptions and behavior Awarded the prestigious Prix Paul Ricoeur on its original publication in France in 2011 The Empire of Value has been substantially revised and enlarged for this edition with an entirely new section discussing the financial crisis of 2007 2008

**The Dawn Of Universal History** Raymond Aron, 2009-06-16 In this collection of essays written over a period of almost forty years Raymond Aron explores the rise of nationalism in Europe through the two world wars and the subsequent disintegration of her empires With a richness of detail and sweeping breadth of historical examples he chronicles and analyzes the history of the opposite ideological extremes of Fascism and Marxism and their descent into totalitarianism via secular religiosity Aron also examines French imperialism through the examples of Algeria and Indochina as well as America's role as an imperial republic during and after World War II Aron was never orthodox in his ideology neither his republican political penchants nor his dialectical intellectual orientation ever gained the upper hand over his devotion to empirical reality The result here is an intellectual history that seems less concerned about where it falls on the political spectrum than about getting it right
