Non Invasive Artificial Ventilation Stefano Nava, Francesco Fanfulla, 2013-11-22 Over the last two decades the increasing use of noninvasive ventilation NIV has reduced the need for endotracheal ventilation thus decreasing the rate of ventilation induced complications Thus NIV has decreased both intubation rates and mortality rates in specific subsets of patients with acute respiratory failure for example patients with hypercapnia cardiogenic pulmonary edema immune deficiencies or post transplantation acute respiratory failure Despite the increased use of NIV in clinical practice there is still a need for more educational tools to improve clinicians knowledge of the indications and contraindications for NIV the factors that predict failure or success and also what should be considered when starting NIV This book has the dual function of being a classical text where the major findings in the literature are discussed and highlighted as well as a practical manual on the tricks and pitfalls to consider in NIV application by both beginners and experts For example setting the ventilatory parameters choosing the interfaces circuits and humidification systems monitoring and the right environment for the right patient will be discussed to help clinicians in their choices

Ventilazione meccanica non invasiva Stefano Nava, Francesco Fanfulla, 2010-02-13 La crescita esponenziale dell'interesse per la ventilazione non invasiva NIV verificatasi negli ultimi 10-15 anni non solo dal punto di vista clinico e applicativo ma anche speculativo ha pochi eguali nella recente storia della medicina In Italia e in Europa in generale tale metodica applicata su larga scala prevalentemente nei reparti di Pneumologia e nelle Unità di Cure Intermedie Respiratorie mentre per quanto riguarda la sua applicazione nei reparti di Terapia Intensiva Generale UTI i dati emersi da uno studio multicentrico condotto nei paesi francofoni vedono la NIV impiegata in una quantità di casi che rappresenta fino al 50% dei pazienti che richiedono assistenza ventilatoria Il recente studio EUROVENT ha inoltre dimostrato come la NIV non si limiti alla sua applicazione acuta dal momento che circa 25 000 pazienti sono attualmente ventilati in cronico a domicilio Inoltre si calcola che milioni di cittadini europei soffrano attualmente di disturbi respiratori durante il sonno e per molti di essi il trattamento medico di prima scelta rappresentato dalla NIV Questo libro si propone lo scopo di richiamare l'attenzione sulle più recenti acquisizioni in questo campo con la speranza di fornire uno strumento valido e maneggevole per la scelta e l'impostazione della migliore modalità di ventilazione
