Research in Education, 1974 Reconstructing Response to Student Writing Dan Melzer, 2023-08-07 In *Reconstructing Response to Student Writing* Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self assessment are more central than teacher response Presenting the results of a national study of teacher and peer response and student self assessment at institutions of higher education across the United States Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student

writing and more on engaging in dialogue with student self assessment and peer response focusing on growth and transfer rather than products and grades Reconstructing Response to Student Writing especially when taken together with Melzer s previous book Assignments across the Curriculum provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States **Resources in Education** ,1998
