Developed countries face the challenge of providing services to an ageing population with changing health needs while countries with developing health systems must find ways of ensuring their populations are provided with access to healthcare. Innovative thinking is essential to meet these twin challenges but innovation is both a cause and cure of many struggles in healthcare: we need it but it is hard to manage and the introduction of new technology can lead to higher costs. Using real life examples and case studies from around the world, this book introduces the latest thinking on understanding and managing healthcare innovation more effectively. It does this from the perspective of governments responsible for shaping health policy, healthcare organisations providing services and juggling competing demands, and from the perspective of the industries that supply the new drugs, devices and other technologies. *Managing Innovation in Healthcare* is the perfect accompaniment for MSc, PhD and MBA students on health policy, management and public health courses, as well as managers, consultants and policy makers involved in healthcare services in both the public and private sector. *The Digital Marketer* Larry Weber, Lisa Leslie Henderson, 2014-04-14. Big data, Digital loyalty programs, Predictive analytics, Contextualized content. Are you ready? These are just a few of the newest trends in digital marketing that are part of our everyday world. How customer insights derived from big and small data and analytics, combined with software design and creativity, can create the customer experience differential. With the authors' decades of combined experience filling its pages, *The Digital Marketer* gives every marketer the tools they need to reinvent their marketing function and business practices. It helps businesses learn to adapt to a customer-centric era and teaches specific techniques for engaging customers effectively through technology. Lewin, Martin Kenney, Johann Peter Murmann, 2016-04-14. The miracle growth of the Chinese economy has decreased from a compound annual growth rate of 10% to less than 7% in 2015. The two engines of growth, export on a scale never before witnessed and massive infrastructure investments, are reaching the point of diminishing returns. This poses the central question which is explored in this book: can China escape the middle income trap? Assuming current political arrangements remain unchanged and that it does not or cannot adopt Western sociopolitical economic regimes, can China develop an indigenous growth model centered on innovation? This compilation gathers leading Chinese and other international scholars to consider the daunting challenges and complexities of building an innovation-driven Chinese growth model. Providing several comprehensive perspectives, it examines key areas such as the institutional system, technology,

sociocultural forces and national policy The analyses and their conclusions range from strong optimism to deep pessimism about China's future
