Strengthening the National Institute of Justice National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Assessing the Research Program of the National Institute of Justice, 2010-11-14 The National Institute of Justice NIJ is the nation's primary resource for advancing scientific research development and evaluation on crime and crime control and the administration of justice in the United States Headed by a presidentially appointed director it is one of the major units in the Office of Justice Programs OJP of the U S Department of Justice Under its authorizing legislation NIJ awards grants and contracts to a variety of public and private organizations and individuals At the request of NIJ Strengthening the National Institute of Justice assesses the operations and quality of the full range of its programs These include social science research science and technology research and development capacity building and technology assistance The book concludes that a federal research institute such as NIJ is vital to the nation's continuing efforts to control crime and administer justice No other federal state local or private organization can do what NIJ was created to do Forty years ago Congress envisioned a science agency dedicated to building knowledge to support crime prevention and control by developing a wide range of techniques for dealing with individual offenders identifying injustices and biases in the administration of justice and supporting more basic and operational research on crime and the criminal justice system and the involvement of the community in crime control efforts As the embodiment of that vision NIJ has accomplished a great deal It has succeeded in developing a body of knowledge on such important topics as hot spots policing violence against women the role of firearms and drugs in crime drug courts and forensic DNA analysis It has helped build the crime and justice research infrastructure It has also widely disseminated the results of its research programs to help guide practice and policy But its efforts have been severely hampered by a lack of independence authority and discretionary resources to carry out its mission

Reviews in Animal Welfare Barbara Padalino , Edward Narayan, 2024-10-04 Animal welfare research is

growing although some topics have been studied more in depth than others Pet species and farm animal welfare are better studied than exotic and wildlife species However there are still many gaps in knowledge related to animal welfare For instance there is still the need to understand how to measure positive welfare or how to aggregate the different feelings and experiences that an animal feels during the different stages of life New technologies have been proposed to monitor the welfare of animals providing more objective data but there are still very few tools that have been validated This Research Topic aims to collect reviews of the literature on animal welfare topics related to all species from companion animals to livestock and from laboratory animals to wild animals The invited reviews metanalysis of the literature should highlight the acquired knowledge and the current gaps of knowledge within this field Our main goal is to identify which topics were devoted more scientific attention in recent years concerning animal welfare and identify which topics are still overlooked by current research

Fundamental Problems and Solutions in Finance Zhiqiang Zhang,2023-04-27 This book provides innovative solutions to fundamental problems in finance such as the valuation of bond and equity the pricing of debt equity and total asset the determination of optimal capital structure etc which are unsolved or poorly solved so far The solutions in this book all have the following features Based on essential assumptions in line with reality the final solutions are analytical solutions with closed form models the forms and variables of the models are determined by strict and objective logic processes rather than chosen or presumed subjectively such as the new growth model for stock valuation the new CAPM accounting for total risk rather than only systematic risk the real solution to optimal capital structure based on the trade off between tax shield and bankruptcy cost In addition these basic solutions or models are adjusted easily to various application scenarios

Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten expanded and updated Additionally new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed The Handbook authors continue to be international leaders in their respective fields the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community

Essential Behaviour Analysis Julian Leslie, 2015-10-15 Since the so called cognitive revolution in psychology in the 1960s it has often been said that behaviourism is dead This book demonstrates why this is not the case and how the behavioural approach has continued to flourish Leslie begins by summarising the behavioural approach to psychology and shows how it differs from other contemporary and cognitive approaches The basic principles of the discipline are outlined and linked to major areas of interest and importance such as behavioural neuroscience resolution of human behavioural problems and human language and cognition Behaviour analysis is thus shown to contribute to our developing understanding of the relationship between brain systems and psychological problems to provide an effective and scientifically based approach to human behavioural problems and to deal with topics central to modern psychology
