markets and the wave of trade protectionism washing up all over the world in the wake of various economic stimulus and bailout packages they all hinge on the new realities of a world where demand for oil eventually outstrips supply According to maverick economist Jeff Rubin there will be no energy bailout The global economy has suffered oil crises in the past but this time around the rules have changed And that means the future is not going to be a continuation of the past For generations we have built wealth by burning more and more oil Our cars our homes our whole world has been getting bigger in the cheap oil era Now it is about to get smaller There will be winners as well as losers as the age of globalization comes to an end The auto industry will never recover from this oil induced recession but other manufacturers will be opening up mothballed factories Distance will soon cost money and so will burning carbon both will bring long lost jobs back home We may not see the kind of economic growth that globalization has brought but local economies will be revitalized as will our cities and neighborhoods Whether we like it or not our world is about to get a whole lot smaller

Misa, 2011-05-16 Historian Thomas J. Misa's sweeping history of the relationship between technology and society over the past 500 years reveals how technological innovations have shaped and have been shaped by the cultures in which they arose. Spanning the preindustrial past, the age of scientific, political, and industrial revolutions, as well as the more recent eras of imperialism, modernism, and global security, this compelling work evaluates what Misa calls the question of technology. Misa brings his acclaimed text up to date by examining how today's unsustainable energy systems, insecure information networks, and vulnerable global shipping have helped foster geopolitical risks and instability. A masterful analysis of how technology and culture have influenced each other over five centuries, *Leonardo to the Internet* frames a history that illuminates modern-day problems and prospects faced by our technology-dependent world. Praise for the first edition: Closely reasoned, reflective, and written with insight, grace, and wit, Misa's book takes us on a personal tour of technology and history, seeking to define and analyze paradigmatic techno-cultural eras. Technology and Culture Follows Thomas Hughes's model of combining an engaging historical narrative with deeper lessons about technology. American Scholar His case studies, such as that of Italian futurism or the localizations of the global McDonalds, provide good starting points for thought and discussion. *Journal of Interdisciplinary History* This review cannot do justice to the precision and grace with which Misa analyzes technologies in their social contexts. He convincingly demonstrates the usefulness of his conceptual model. *History and Technology* A fascinating, informative, and well-illustrated book. **Choice**

The New Domestic Automakers in the United States and Canada A.J. Jacobs, 2015-12-16 Over the past forty years, state, provincial, and local governments in the United States and Canada have provided foreign automakers with approximately 4.80 billion in incentives in order to lure light-vehicle assembly plants to their areas. This has included tax abatements, infrastructure construction, land giveaways, job training programs, and other subsidies. As of early 2015, ten foreign vehicle makers operated 20 light-vehicle plants in developed North America. Despite the fact that all ten of these automakers have pursued a similar pattern—first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America—each has followed its own specific historical development path and has created its own unique growth trajectory. This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and Canada through early 2015. In addition, it chronicles the histories of more than a dozen former automakers and potential future foreign light-motor vehicle assembly plants in the United States and Canada. This includes the first foreign automaker to build its cars in the United States, De Dion Bouton of France, in July 1900; the early 20th-century endeavors of Fiat, Mercedes, and Rolls Royce; and the present-day hopes of Chinese and Indian automakers. In the process, the text also provides an assessment of the top competing states and sites for any future plants, the possible incentives packages governments may

offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide Toyota's Recalls and the Government's Response United States.
