The Long History of the Future Nicole Kobie,2024-07-04 We love to imagine the future But why are groundbreaking

future technologies always just around the corner and never a reality For decades we've delighted in dreaming about a sci-fi utopia from flying cars and bionic humans to hyperloops and smart cities And why not Building a better world be it a free flying commute or an automated urban lifestyle is a worthy dream Given the pace of technological change nothing seems impossible anymore But why are these innovations always out of reach Delving into the remarkable history of technology The Long History of the Future introduces us to the clever scientists genius engineers and eccentric innovators who first brought these ideas to life and have struggled to make them work since These stories reveal a more realistic picture of how these technologies may evolve and how we'll eventually get to use them You may never be able to buy a fully driverless car but automated braking and steering could slash collision rates Smart cities won't perfect city life but they could help empty bins on time Hyperloops may never arrive but superfast trains are already here We always believe current technology is the best it could be By looking to the past and the future Nicole Kobie shows how history always proves us wrong and how what lies ahead may not be what we imagine but so much better

**Trademark Dilution** Amir Friedman,2022-05-31 The world has changed materially since the foundation of traditional trademark laws according to which the purpose of a trademark was to serve as a differentiating source indicator preventing source confusion in the marketplace Traditionally trademarks protected the public from likelihood of confusion assisted in consumer decisions and reduced search costs The need to award a special scope of protection to famous trademarks from use on non competing goods was first discussed in Kodak in 1898 holding that the use of the word Kodak for a bicycle company does not mislead consumers but takes unfair advantage of reputation However the most significant point in the evolution of dilution in its early stages was the case of Odol decided in 1924 which was the first to acknowledge the need to protect the advertising power of trademarks from being diluted even in the absence of a likelihood of confusion This book will provide that dilution is a sui generis brand remedy applicable to reputed trademarks in accordance to their aggregated inherent and acquired strength The book will address the non harmonised nature of dilution which reflects a problem in an age of borderless trade and cyber commerce and emphasises the need to answer the question To what extent should reputed trademarks be protected by dilution beyond the traditional trademark protection from likelihood of confusion The book includes a proposal for an operative legal framework based on conclusions and distinctions derived from the comparison of dilution as adopted and interpreted in different areas of the world comparative case studies and comparison with neighbouring legal rights such as Tort Law Unfair Competition Moral Rights Equitable Rights Publicity Rights and Unlawful Enrichment
