Practical Guide to Simulation in Delivery Room Emergencies Gilda Cinnella, Renata Beck, Antonio

Malvasi, 2023-06-13 In this book the use of hybrid simulation in delivery room emergencies is described and shown. The use of a patient actor combined with a task trainer within the same session substantially improves the training for practical management of intrapartum emergencies in real life, reducing the risk of failure of operative vaginal delivery and of related adverse events including perinatal or maternal complications. Furthermore, simulation with high reality computerized mannequin and scenography of emergency situation can improve technical and manual skills of the participants. For this book and the related videos, a new generation of mannequins suitable for both clinical manoeuvres and ultrasound examination is used to simulate all clinical scenarios of emergency that can happen in the delivery room for both the mother and the child. This unique book is a useful tool for medical students, residents, practicing pediatricians, anesthetists, obstetricians, and all health care professionals working in the delivery room in their ability to deal with critical and emergency situations with safety and good medical practice.

Lowering the Boom Jay Beck, Tony Grajeda, 2023-12-11 As the first collection of new work on sound and cinema in over a decade, *Lowering the Boom* addresses the expanding field of film sound theory and its significance in rethinking historical models of film analysis. The contributors consider the ways in which musical expression, scoring, voice over narration, and ambient noise affect identity formation and subjectivity. *Lowering the Boom* also analyzes how shifting modulation of the spoken word in cinema results in variations in audience interpretation. Introducing new methods of thinking about the interaction of sound and music in films, this volume also details avant garde film sound, which is characterized by a distinct break from the narratively based sound practices of mainstream cinema. This interdisciplinary global approach to the theory and history of film sound opens the eyes and ears of film scholars, practitioners, and students to film's true audio visual nature. Contributors are Jay Beck, John Belton, Clark Farmer, Paul Grainger, Tony Grajeda, David T. Johnson, Anahid Kassabian, David Laderman, James Lastra, Arnt Maas, Matthew Malsky, Barry Mauer, Robert Miklitsch, Nancy Newman, Melissa Ragona, Petr Szczepanik, Paul Thiberge, and Debra White.
