Relational Responses to Trauma in Twenty-First-Century French and Spanish Women's Writing
Hannie Lawlor, 2024-08-28

Relational Responses to Trauma in Twenty First Century French and Spanish Women s Writing offers new insight into what it means to write relational lives It broadens the parameters of existing discussions in terms of geography as well as genre drawing together two literatures whose prominence in life writing theory to date could hardly be more different while French women s writing has long been at the centre of international discussions of autobiography the relative invisibility of Spanish women s writing remains striking The dialogue that thus underpins this study between diverse twenty first century case studies and broader approaches to life writing shines a light on what is gained from inviting different voices into the discussion These narrative projects challenge longstanding critical assumptions in autobiography studies and trauma theory about how writers can and should represent the multiple perspectives that are at the heart of intergenerational stories In exploring the narrative solutions that these texts propose in response to the ethical questions they navigate this book shows that writing relational lives rests on far more than the mere recounting of a shared history Relating in these texts it proposes is an act embedded in the telling of the story It is a mode of testifying together to traumatic experience one that reveals a powerful preoccupation in contemporary women s life writing practice with making more audible the many voices and versions that go unheard

Small Farmers for Global Food Security Thomas Reuter, Graeme MacRae, 2024-04-05 Food systems in Indonesia and worldwide have experienced major transformations in the wake of agricultural modernisation Once intact eco systems have declined dramatically along with human diets long term food security and social cohesion Using long term ethnographic research we documented this loss of traditional food systems in Java Bali East Timor and India but also a recent revival and reinvention of sustainable production methods and community based distribution systems A growing movement of small farmers now reject the dominant paradigm of aggressive capitalist development and are re creating food systems based on moral ecology a new concept we introduce to characterise food systems that regenerate the natural environment and serve the common good rather than maximise profit Small farmers like these already feed two thirds of humanity using only a third of agricultural land With proper support we argue they could feed the entire world using sustainable and socially responsible approaches to eradicate world hunger

Invisible Digital Aylish Wood, 2024-01-11 Invisible Digital helps us makes sense of something we cannot see by presenting an innovative approach to digital images and digital culture At its heart is a novel method for exploring software used in the creation of moving images as markers of converging cultural organizational and technological influences The three main case studies of Invisible Digital are the animated feature Moana 2016 and the computer games No Man s Sky 2016 and Everything 2017 All three were created using procedural techniques simulation software for Moana and procedural content generation for No Man s Sky and Everything Production culture disclosures associated with procedural techniques often emphasize the influences of automated systems and their algorithms making them ideal for a study that interrogates digital processes The approach of Invisible Digital is informed by relational theories and the concept of entanglement based on materialist perspectives combined with insights from work that more explicitly

interrogates algorithms and algorithmic culture Aylish Wood employs the notion of assemblages to introduce the concept of material cultural narratives Using this conceptual framework she draws out material cultural narratives for each case study to demonstrate what they reveal about software and digital culture These analyses of software provide a widely applicable method through which moving image studies can contribute more fully to the wider and growing debates about algorithmic culture
