Adolescent Health Communication Kevin Harvey, 2014-02-25 A comprehensive corpus analysis of adolescent health communication is long overdue and this book provides it We know comparatively little about the language adolescents use to articulate their health concerns and discourse analysis of their choices can shed light on their attitudes towards and beliefs about health and illness This book interrogates a two million word corpus of messages posted by adolescents to an online health forum It adopts a mixed method corpus approach to health communication combining both quantitative and qualitative techniques Analysis in this way gives voice to an age group whose subjective experiences of illness have often

Multimodality and Active Listenership Dawn Knight, 2011-10-13 Current corpora are invaluable resources for generating accurate and objective analyses of patterns of language use However spoken corpora are effectively mono modal presenting data in the same physical medium text The reality of a discourse situation is lost in its representation as text Using multimodal data sets when conducting corpus based pragmatic analyses is one solution This book looks at multimodal corpora in some depth using backchanneling as the conversational feature to be analysed It provides a bottom up investigation of the issues and challenges faced at every stage of multimodal corpus construction and analysis as well as providing an in depth linguistic analysis of a cross section of multimodal corpus data The collaborative and co operative nature of backchannels is highlighted in this book and an adapted pragmatic functional linguistic coding matrix for the characterisation of backchanneling phenomena is presented Dawn Knight also looks at possible directions in the construction and use of multimodal corpus linguistics

The Prosody of Formulaic Sequences Phoebe Lin, 2018-09-20 To apply the same approaches to analysing spoken and written formulaic language is problematic to do so masks the fact that the contextual meaning of spoken formulaic language is encoded to a large extent in its prosody In The Prosody of Formulaic Sequences Phoebe Lin offers a new perspective on formulaic language arguing that while past research often treats formulaic language as a lexical phenomenon the phonological aspect of it is a more fundamental facet This book draws its conclusions from three original empirical studies of spoken formulaic language assessing intonation unit boundaries as well as features such as tempo and stress placement Across all studies Lin considers questions of methodology and conceptual framework The corpus based descriptions of prosody outlined in this book not only deepen our understanding of the nature of formulaic language but have important implications for English Language Teaching and automatic speech synthesis

Berman, 2020-03-18 The goal of the volume is to shed fresh light on Modern Hebrew from perspectives aimed at readers interested in the domains of general linguistics typology and Semitic studies Starting with chapters that provide background information on the evolution and sociolinguistic setting of the language the bulk of the book is devoted to usage based studies of the morphology lexicon and syntax of current Hebrew Based primarily on original analyses of authentic spoken and online materials these studies reflect varied theoretical frames of reference that are largely model neutral in approach To this end the book presents a functionally motivated dynamic approach to actual usage rather than providing strictly structuralist or formal characterizations of particular linguistic systems Such a perspective is particularly important in the case of a language undergoing accelerated processes of change in which the gap between prescriptive dictates of the Hebrew Language Establishment and the actual usage of educated literate but non expert speaker writers of current Hebrew is constantly on the rise Theories in Second Language Acquisition Bill VanPatten, Gregory D.
