which can only be achieved through the use of a manufacturing cell The inventory buffer exists but it is rarely used The Andon system includes a buffer There is a safeguard in place to protect your customer There is a buffer to prevent the entire manufacturing line from being shut down to rectify a problem There is a buffer in place to prevent the breakdown of a vital manufacturing process Just in time production is a manufacturing system that produces and delivers only what is required only when it is required and only in the amount required The Toyota Production System is built on two pillars JIT and jidoka JIT is based on heijunka and consists of three operating elements the pull system takt time and continuous flow 2020
