Reducing Carbon Emissions from Transport Great Britain: Parliament: House of Commons: Environmental Audit Committee,2006-08-07 The Committee s report examines the challenges involved in efforts to reduce carbon emissions from the UK transport sector and makes recommendations to improve future progress as part of its overall priority for the current Parliament of focusing on climate change issues Topics discussed include the Government s strategic priorities measures to reduce carbon emissions from road transport trains water freight and aviation emissions from developing economies the future price and availability of oil The report finds that reducing carbon emissions from transport is particularly challenging given its dependence on oil with transport being the only sector of the UK economy in which carbon emissions were higher in 2004 than the baseline year of 1990 and projected emissions likely to be higher in 2020 than in 1990 Amongst the report s 66 conclusions and recommendations the Committee raises concerns over the lack of consistency and accuracy in methods used by the Government to calculate emissions projections and highlights the need for more decisive action to actively encourage modal shift towards lower carbon modes of transport such as trains buses and low carbon cars and lorries and to discourage marginal car and plane journeys It recommends the introduction of a national road user charging scheme as soon as technically possible and a new policy to enforce speed limits and an increase in air passenger duty APD and taxes on domestic flights The report also calls for better local rail services and the need to make rail fare and ticketing structures simpler and more transparent in order to encourage greater use of rail services and the need for a public information campaign to raise awareness about the reality and dangers of climate change and a cross party approach to the measures required to tackle it *Action auto moto* ,2006 *De Kampioen* ,2001-09 De Kampioen is the magazine of The Royal Dutch Touring Club ANWB in The Netherlands It s published 10 times a year with a circulation of approximately 3 5 million copies *Paris Match* ,2003-04
