Inevitable Mike Colias, 2025-02-04 A sweeping portrait of the EV transformation and what it means for all of us The question is no longer if electric vehicles will happen or even when they will happen but how Veteran automotive reporter Mike Colias takes you inside the transformation in this thoroughly reported profile of the hard pivot in the car business a 2 trillion industry undergoing the biggest change in its 120 year history a change that is already sending ripples across the entire global economy Colias documents the inevitable shift from pistons to electrons from every angle taking you inside the boardrooms where executives battle over their EV strategies to take on Tesla and more recently emerging Chinese powerhouses such as BYD He brings you to family run car dealerships deciding if they will sell EVs or sell their businesses He follows entrepreneurs along lonely stretches of road that will soon need charging stations He talks to power train engineers whose skills were once the beating heart of the automotive industry but who now find themselves being replaced by coders This is an epic exploration that stretches from Detroit to Japan to Germany to China and from factories in Normal Illinois and Haywood County Tennessee to a burgeoning mining operation along the shores of California's briny lithium rich Salton Sea Inevitable is a deeply enjoyable and smart book that uses masterful storytelling to capture the expanse and dynamism of the transition to electric vehicles in profound detail bringing to life its seismic effects on everything and everyone The Rational Animal Douglas T Kenrick, Vidas Griskevicius, 2013-09-10 Why do three out of four professional football players go bankrupt How can illiterate jungle dwellers pass a test that tricks Harvard philosophers And why do billionaires work so hard only to give their hard earned money away When it comes to making decisions the classic view is that humans are eminently rational But growing evidence suggests instead that our choices are often irrational biased and occasionally even moronic Which view is right or is there another possibility In this animated tour of the inner workings of the mind psychologist Douglas T Kenrick and business professor Vidas Griskevicius challenge the prevailing views of decision making and present a new alternative grounded in evolutionary science By connecting our modern behaviors to their ancestral roots they reveal that underneath our seemingly foolish tendencies is an exceptionally wise system of decision making From investing money to choosing a job from buying a car to choosing a romantic partner our choices are driven by deep seated evolutionary goals Because each of us has multiple evolutionary goals though new research reveals something radical there's more than one you making decisions Although it feels as if there is just one single self inside your head your mind actually contains several different subselves each one steering you in a different direction when it takes its turn at the controls The Rational Animal will transform the way you think about decision making And along the way you will discover the intimate connections between ovulating strippers Wall Street financiers testosterone crazed skateboarders Steve Jobs Elvis Presley and you

Generation Deluxe Iris Nowell, 2004-06-28 They fork out 100 million for starter castles 500 000 for a customized Mercedes and 1 2 million for a watch While Generation Deluxe explores the spending patterns of the wealthy a dark

Brandwashed Martin Lindstrom,2012-01-03 Marketing visionary Martin Lindstrom has been on the front line of the branding for over twenty years In Brandwashed he turns the spotlight on his own industry drawing on all he has witnessed behind closed doors exposing for the first time the full extent of the psychological tricks and traps that companies devise to win our hard earned money Lindstrom reveals eye opening details such as how advertisers and marketers target children at an alarmingly young age starting when they are still in the womb what heterosexual men really think about when they see sexually provocative advertising how marketers and retailers stoke the flames of public panic and capitalize on paranoia over diseases extreme weather events and food contamination scares It also presents the first ever evidence to prove how addicted we are to our smartphones and how certain companies like the maker of a very popular lip balm purposely adjust their formulas in order to make their products chemically addictive and much much more Brandwashed is a shocking insider s look at how today s global giants conspire to obscure the truth and manipulate our minds all in service of persuading us to buy *The Spectator* ,2006

CLIMATE CHANGE and the road to NET-ZERO Mathew Hampshire-Waugh,2021-06-01 **CLIMATE CHANGE and the road to NET ZERO** is a story of how humanity has broken free from the shackles of poverty suffering and war and for the first time in human history grown both population and prosperity It s also a story of how a single species has reconfigured the natural world repurposed the Earth s resources and begun to re engineer the climate The book uses these conflicting narratives to explore the science economics technology and politics of climate change **NET ZERO** blows away the entrenched idea that solving global warming requires a trade off between the economy and environment present and future generations or rich and poor and reveals why a twenty year transition to a zero carbon system is a win

win solution for all on planet Earth

Reviews Readers Favorite Five Stars An excellent layman's perspective of the climate problem today how it has evolved over time and the different approaches to solving the problem I recommend it highly

Mark Z Jacobson Professor of Civil and Environmental Engineering at Stanford University and author of 100% Clean Renewable Energy and Storage for Everything Mathew brings his wide ranging experience of financial markets particularly in modelling and forecasting to add a unique insight to the climate challenge On one hand helping us understand how fossil fuels drove prosperity and let the world's population escape the poverty trap whilst on the other how rising levels of CO₂ in the atmosphere placed the world at mortal risk In this book Mathew's financial understanding comes to the fore revealing why we need a sound understanding of economics climate science and financial modelling to give us the signals we need to act today

Mark Campanale Executive Chairman of the Carbon Tracker Initiative and founder of the unburnable carbon capital markets thesis Provides a clear understanding of the technical complexities of reaching zero carbon

Hampshire Waugh approaches the subject with intellectual rigour boundless curiosity and compelling story telling A must read for anyone interested in climate change and net zero

Vincent Gilles Chief Investment Officer at Clim8 Invest The book that says it all and answers all questions Backed by data analysis and science Hampshire Waugh explains how climate change if left unchecked threatens to unravel 200 years of human progress But it need not end this way The author shows that building a net zero carbon economy is within human reach through focused innovation riding down the experience curve and reaching scale in clean energy technologies and solutions Mathew shows how we can solve climate change and air pollution whilst driving development in the poorest parts of the world and without compromise for those already accustomed to the highest quality of life

Geetu Sharma Founder of AlphasFuture LLC a sustainability focused investment business

About the Author Dr Mathew Hampshire Waugh has spent the last decade working as an equity analyst at a global investment bank He has worked with the top executives of many multi billion dollar companies and built relationships with many of the world's largest investment managers Mathew's work centred on forecasting technology trends financial performance and the intrinsic value of companies involved in markets including renewable energy electric cars battery technology and biofuels Prior to his career in the banking industry the author gained his doctorate in materials chemistry from University College London where he worked on novel coatings and nano materials for use in energy saving glazing and solar panel design During his doctorate Mathew registered a patent for an efficiency enhancing coating for solar modules published numerous scientific papers and engaged in public speaking consultancy and media outreach

From the Author I wrote Climate Change and the road to Net Zero to provide a generalist reader with a clear comprehensive and objective take on the issues surrounding climate change and air pollution The book walks the reader through a history of energy innovation and the rise of human civilisation how scientists have come to understand our past climate and can now forecast future change the problems economists encounter as they attempt to piece together the potential monetary and social damages from climate inaction and a technology agnostic

assessment of potential climate change solutions from climate engineering to mitigation including their costs risks and limitations The book demonstrates why sustainable technologies such as wind solar and batteries get cheaper with scale of production not time and why a rapid transition to a fully fledged net zero system will end up significantly cheaper than remaining bound to fossil fuels whilst also avoiding the worst impacts of climate change and preventing nearly eight million premature deaths each year from air pollution I hope Climate Change and the road to Net Zero delivers an understanding of humanity's relationship with Earth that is as intriguing as Simon Lewis and Mark Maslin's The Human Planet or Yuval Noah Harari's Sapiens I very much hope too that the book conveys the passion and call to action of David Wallace Wells's The Uninhabitable Earth coupled with the sober economic analysis of The Climate Casino by William Nordhaus or Capital in the 21st century by Thomas Piketty and that it provides the technical rigour of Sustainable Energy Without The Hot Air by David MacKay the rationality of Hans Rosling's Factfulness and the eternal hope of The Future We Choose by Christiana Figueres and Tom Rivett Carnac I believe net zero will be cheaper cleaner safer more reliable more sustainable and will create more employment than if we remain bound to fossil fuels After reading the book I hope you will agree Mathew Hampshire Waugh

The Shaping of Us Lily Bernheimer, 2019-06-29 The spaces we inhabit from homes and workspaces to city streets mediate community creativity and our very identity Using insights from environmental psychology design and architecture The Shaping of Us shows how the built and natural worlds subtly influence our behavior health and personality Exploring ideas such as ruin porn and ninja proof seating mysteries of how we interact with the physical spaces around us are revealed From caves and cathedrals to our current housing crisis and the dreaded open plan office Lily Bernheimer demonstrates that for our well being we must reconnect with the power to shape our spaces Have you ever wondered why we adorn our doorframes with moldings What does Wikipedia's open source technology have to teach us about the history and future of urban housing What does your desk say about your personality From savannahs and skyscrapers to co working spaces The Shaping of Us shows that the built environment supports our well being best when it echoes our natural habitats in some way In attempting to restore this natural quality to human environments we often look to other species for inspiration The real secret to building for well being Bernheimer argues is to reconnect humans with the power to shape our surroundings When people are involved in forming and nurturing their environments they feel a greater sense of agency community and pride or collective efficacy And when communities have high rates of collective efficacy they tend to have less litter vandalism and violent crime Playful and accessible The Shaping of Us is a delightful read for designers professionals and anyone wanting to understand how spaces make us tick and how to

fix the broken bits of our world **Letting Go of the Glitz** Julia Stephenson, 2009-06-18 Help I'm Married Alive Julia Stephenson struggling to cope with life as a Surrey housewife grimly welded to her electric floor polisher and fed up with her golf addicted BMW driving husband bolts to the fleshpots of London Here she forges a new life as single girl about town in her Chelsea eyrie a short walk from Peter Jones Bemused to find herself an It girl life soon becomes a ritzy blur of parties popping corks and flashbulbs while handsome aristocratic boyfriends come and go Realising she isn't cut out for this she reinvents herself as a femme serieuse representing the Green Party at the general election and begins to convert her flat into the first carbon neutral dwelling in Sloane Square Giving up her usual dating fodder of Old Etonians and bankers she embarks on a tempestuous love affair with her builder Who wants to be driven around in a Porsche when you can be ferried about in a spacious white van that runs on waste cooking oil Life is so much better in every way when you let go of the glitz

Branding that Means Business Matt Johnson, Tessa G Misiaszek, 2022-10-25 A revelatory guide on how to build sustain and grow a brand A brand is either beloved or it's noise We live in a fast paced world of immediate gratification where consumers can listen to any song watch any movie or read any article with the touch of a few buttons They are peppered with hyper personalized targeting for products that can be ordered seamlessly and arrive within hours And if your brand isn't the first to come to mind they'll click that button and it'll be delivered by someone else So how do you make sure your brand connects with consumers Branding that Means Business draws from the authors experience and business literature as well as psychology sociology and even anthropology to show readers that while any brand serves the business the mechanisms that enable it are all about connecting with people Readers will learn how to create maintain and operationalize their brand and think creatively about how to differentiate their product and most importantly make consumers fall in love with it
