Auto Mania Tom McCarthy, 2007-01-01 The twentieth century American experience with the automobile has much to tell us about the relationship between consumer capitalism and the environment Tom McCarthy contends In Auto Mania he presents the first environmental history of the automobile

that shows how consumer desire and manufacturer decisions created impacts across the product lifecycle from raw material extraction to manufacturing to consumer use to disposal From the provocative public antics of young millionaires who owned the first cars early in the twentieth century to the SUV craze of the 1990s Auto Mania explores developments that touched the environment Along the way McCarthy examines how Henry Ford s fetish for waste reduction tempered the environmental impacts of Model T mass production how Elvis Presley s widely shared postwar desire for Cadillacs made matters worse how the 1970s energy crisis hurt small cars and why baby boomers ignored worries about global warming McCarthy shows that problems were recognized early The difficulty was addressing them a matter less of doing scientific research and educating the public than implementing solutions through America s market economy and democratic government Consumer and producer interests have rarely aligned in helpful ways and automakers and consumers have made powerful opponents of regulation The result has been a mixed record of environmental reform with troubling prospects for the future

Nature and the Environment in Twentieth-Century American Life Brian C. Black, 2006-05-30 Americans during the twentieth century became more disconnected from the environment and nature than ever before More Americans lived in cities rather than on farms they became ever more reliant on technology to interact with the world around them and with each other Perhaps paradoxically the twentieth century also became the period in which environmental issues played an ever increasing role in politics and public policy Why is this so Perhaps because despite what many people believe nature and the environment remains central to everyone's daily life Pollution environmental degradation urban sprawl loss of wildlife and biodiversity all of these issues directly impact how everyone even city dwellers live their lives *Nature and the Environment in Twentieth Century America* addresses a wide variety of the environmental issues that impacted the lives of people of all classes races and regions The expansion of the National Park system and the increased desire for leisure time spent in the great outdoors The devastation of the Dust Bowl and its impetus toward conservation and a greater understanding of ecology Grassroots activism and environmental politics from Rachel Carson to Love Canal The impact of globalization and its environmental consequences on the daily lives of Americans Part of the *Daily Life through History* series this title joins *Nature and the Environment in Nineteenth Century America* in a new branch of the series titles specifically looking at how science innovations impacted daily life

Ingenious Jason Fagone, 2013-11-05 An epic tale of invention in which ordinary people's lives are changed forever by their quest to engineer a radically new kind of car In 2007 the X Prize Foundation announced that it would give 10 million to anyone who could build a safe mass producible car that could travel 100 miles on the energy equivalent of a gallon of gas The challenge attracted more than one hundred teams from all over the world including dozens of amateurs Many designed their cars entirely from scratch rejecting decades of thinking about what a car should look like Jason Fagone follows four of those teams from the build stage to the final race and beyond into a world in which destiny hangs on a low drag coefficient and a lug nut can be a beautiful talisman The result is a gripping story of crazy collaboration absurd risks colossal hopes and poignant losses In an old pole barn in central Illinois childhood sweethearts hack together an electric powered dreamboat using scavenged parts forging their own steel and burning through their life savings In Virginia an impassioned entrepreneur and his hand picked squad of speed freaks pool their imaginations and build a car so light that you can push it across the floor with your thumb In West Philly a group of disaffected high school students come into their own as they create a hybrid car with the engine of a Harley motorcycle And in Southern California the early favorite a start up backed by millions in venture capital designs a car that looks like an alien egg

Ingenious is a joyride Fagone takes us into the garages and the minds of the inventors capturing the fractious yet beautiful process of engineering a bespoke machine Suspenseful and bighearted this is the story of ordinary people risking failure economic ruin and ridicule to create something vital that Detroit had never pulled off As the Illinois team wrote in chalk on the wall of their barn **SOMEBODY HAS TO DO SOMETHING THAT SOMEBODY IS US**
