Designing Accessible Technology P. John Clarkson, P. Langdon, P. Robinson, 2006-08-02 Rapid and unprecedented population ageing poses a serious social and economic challenge across the developed world Shifts in dependency ratios point to escalating welfare and pensions costs which require radical and imaginative responses from Government and industry Key to this is a healthy population able and willing to work longer before retirement and who can be independent for as long as possible afterwards as well as bringing disabled people into mainstream life and employment This book was stimulated by the 3rd CWUAAT workshop the CWUAAT workshops have a general focus on product and solution development It was held in Cambridge UK in April 2006 Contributions from leading researchers focused on design issues for a more inclusive world enabling computer access and the development of new technologies assistive technology and rehabilitation robotics and understanding users and involving them in design *Automotive News*, 2003 [Emerging Sustainable and Renewable Composites](#) A. Atiqah, S. M. Sapuan, R. A. Ilyas, Z. M. A. Ainun, K. Z. Hazrati, 2024-07-03 This edited volume presents a comprehensive discussion of emerging sustainable and renewable composites from tropical fibres and provides an in depth analysis of their prospective applications as replacements for conventional petroleum based packaging and the challenges regarding this Readers will gain a comprehensive understanding of the development and characterization of sustainable and renewable composites from fibres such as sugar palm kenaf sisal curau and coir They will also learn about new potential materials from such fibres and their potential use in various nanoelectronics applications Each chapter provides recent insight from some of the field s most prominent industry and academic professionals Chapter contributors present valuable case studies and describe related environmental issues environmental advantages and challenges Topics include biodegradability tensile and other physical properties and applications Consequently readers can apply this knowledge to the further development of sustainable and renewable composites toward their global use in place of petroleum

based materials and in new electronics products This book is an invaluable and accessible guide for researchers and postgraduate students of composites engineering and nanotechnology who wish to learn more about composites from tropical fibres and their applications The practical information will benefit those who wish to advance research in this field and promote the adoption of these materials in areas including packaging and nanoelectronics
